HISTORICAL SKETCH.

The United States Military Academy is a school for the practical and theoretical training of cadets for the military service. Upon completing its course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the Army the duties of which they have been judged competent to perform.

The supervision and charge of the Academy are in the War Department under such officer or officers as the Secretary of War may assign to that duty (section 1331, Revised Statutes). In conformity with the provisions of this section, the Chief of Staff has been, by direction of the Secretary, charged with the supervision of matters in the War Department pertaining to the Academy.

The occupation of West Point as a military post took place on January 20, 1778, and has been continuous since that date. The earliest proposal for a military school for the United States was that of Brigadier General Henry Knox, Chief of Artillery (May, 1776). His plans were seconded by Colonel Alexander Hamilton and approved by General Washington, though they were not adopted in the form suggested before 1802, other counsels having temporarily prevailed.

On October 1, 1776, Congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." The result was the resolution of June 20, 1777, providing for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments." The invalid Corps was organized in July, 1777, and in 1781, at the request of Washington, was marched from Philadelphia to form part of the garrison at West Point, where an engineer school, a laboratory, and a library had already been established in three separate buildings.

On March 30, 1779, the Board of War adopted regulations for the Corps of Engineers and for the Sappers and Miners. These were promulgated in orders, July 30, 1779, by George Washington and provided for a plan of instruction to be carried into effect after approval by the Board and by the General-in-Chief. The plan contemplated lectures, by engineer officers, on fortification, mining, reconnaissance, encampments and the like. Practical experiments in gunnery were conducted at West Point as early as February, 1780. In 1783, after the cessation of hostilities, Washington, having been called upon for his views as to the peace establishment, laid the matter of a Military Academy before his officers at Newburg. He referred to it again in his message on December 3, 1793. The law of May 9, 1794, authorized the organization of a Corps of Artillerists and Engineers with two cadets to a company, thus creating the new grade of "cadet" in the American Army. A school for the Artillerists and Engineers, and for the cadets attached to the Corps, was established, on the recommendation of Washington, by order, at West Point in 1794. The destruction of its buildings by fire, in 1796, caused its suspension. In July, 1801, the Secretary of War directed that all the cadets of the Corps of Artillerists should report at West Point for instruction, and in September, a school was opened with four army officers and a civilian as administrators and instructors.

An Act of Congress approved March 16, 1802, authorized the President to organize and establish a Corps of Engineers to consist of five officers and ten cadets, and provided that it should be stationed at West Point, in the State of New York, and should constitute a Military Academy. The Academy with ten cadets present, was formally opened July 4, the year of the Act.

Acts of Congress, in 1802 and 1808, authorized 40 cadets from the Artillery, 100 from the Infantry, 16 from the Dragoons, and 20 from the Riflemen; few of these were appointed, and no provision was made for them at the Academy. In 1810, the Academy was deprived of nearly all means of instruction, and officers and cadets had

difficulty in obtaining their pay. During most of the year 1811, and a part of 1812, although war was imminent, academic instruction was practically abandoned. In March, 1812, the Academy was without a single instructor. Up to and including this time, 88 cadets had been graduated; they had entered without mental or physical examination, at all ages from 12 to 34, and at various times during the year.

By Act of Congress of April 29, 1812, the Academy was reorganized. The provisions of this Act have furnished the general principles upon which the Military Academy has since been conducted and controlled; a more adequate corps of professors was authorized; a maximum of 250 cadets was fixed; and the age and the mental requisites for admission were prescribed.

In 1817, under the provisions of the Act of 1812, and the able superintendency of Major Sylvanus Thayer, Corps of Engineers, the present era in the Academy's history opened.

Until 1843, a prescribed residence was not a legal qualification for appointment, but the selection of one cadet from each Congressional district had grown to be customary. In this year the custom became the law, Congress prescribing that the Corps of Cadets should consist of one from each Congressional district, one from each Territory, one from the District of Columbia, and ten from the United States at large, to be appointed by the President.

By the Act of Congress approved May 4, 1916, the Corps of Cadets as now constituted consists of two from each Congressional district, two from each Territory, four from the District of Columbia, two from Porto Rico, four from each State at large and eighty-two from the United States at large, two of whom are appointed upon the recommendation of the Vice President, and twenty of whom are selected from among the honor graduates of educational institutions having officers of the Regular Army detailed as professors of military science and tactics under existing law or any law hereafter enacted for the detail of officers of the Regular Army to such institutions, and which institutions are designated as "honor" schools, upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department. They shall be appointed by the President and shall, with the exception of the eighty-two appointed from the United States at large, be actual residents of the Congressional or Territorial district, or of the District of Columbia, or of the island of Porto Rico, or of the States, respectively, from which they purport to be appointed. The President is also authorized to appoint cadets from among enlisted men, in number as nearly equal as practicable, of the Regular Army and the National Guard, between the ages of nineteen and twenty-two years, who have served as enlisted men not less than one year, to be selected under such regulations as the President may prescribe, but the total number so selected shall not exceed one hundred and eighty at one time. The increase provided for in this Act was divided into four annual increments which were as nearly equal as practicable and were equitably distributed among the sources from which appointments are authorized. Under this Act, and under the apportionment of Members of Congress according to the 13th Census, the maximum number of cadets is 1334.

In addition to the 1,334 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "*Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of the Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stats., 441.)

The total number of graduates, including foreigners receiving instruction under Acts of Congress, from 1802 to June 12, 1924, inclusive, is 7624.

COMMENDATORY REFERENCES TO THE ACADEMY

"I have duly received your letter of the 28th ultimo, enclosing a copy of what you had written to the Secretary of War, on the subject of a Military Academy.

"The establishment of an Institution of this kind, upon a respectable and extensive basis, has ever been considered by me as an object of primary importance to this country; and while I was in the Chair of Government, I omitted no proper opportunity of recommending it, in my public speeches and other ways, to the attention of the Legislature. But I never undertook to go into a detail of the organization of such an academy; leaving this task to others whose pursuits in the paths of science, and attention to the arrangements of such institutions, had better qualified them for the execution of it. For the same reason I must now decline making any observations on the details of your plan; and as it has already been submitted to the Secretary of War, through whom it would naturally be laid before Congress, it might be too late for alterations if any should be suggested.

"I sincerely hope that the subject will meet with due attention, and that the reasons for its establishment which you have so clearly pointed out in your letter to the Secretary, will prevail upon the Legislature to place it upon a permanent and respectable footing."—*George Washington. (Letter to Alexander Hamilton dated Mount Vernon, 12 December, 1799, two days before General Washington died.)*

"I recommend to your fostering care, as one of our safest means of national defense, the Military Academy. This institution has already exercised the happiest influence upon the moral and intellectual character of our Army; and such of the graduates as from various causes may not pursue the profession of arms will be scarcely less useful as citizens. Their knowledge of the military art will be advantageously employed in the militia service, and in a measure secure to that class of troops the advantages which in this respect belong to standing armies."—*Andrew Jackson. (Extract from his First Message to Congress December, 1829.)*

"I give it as my fixed opinion, that but for our graduated cadets, the war between the United States and Mexico might, and probably would, have lasted some four or five years, with, in its first half, more defeats than victories falling to our share; whereas, in less than two campaigns, we conquered a great country and a peace, without the loss of a single battle or skirmish."—*Winfield Scott. (Extract from a letter written by him July 25, 1860, to Lieutenant Ives, Secretary to the U. S. Military Academy Commission.)*

"The foregoing considerations naturally bring to mind the Military Academy at West Point. I believe that the great service which it has rendered the country was never more conspicuous than it has been during the past two years. The faithful and efficient services of its graduates since the declaration of war with Spain have more than repaid the cost of the institution since its foundation. They have been too few in number and most heavily burdened."—*Elihu Root. (Extract from his report as Secretary of War, June 30, 1899.)*

"This institution has completed its first hundred years of life. During that century no other educational institution in the land has contributed so many names as West Point has contributed to the honor roll of the nation's greatest citizens."—*Theodore Roosevelt. (Extract from his address at the Centennial Exercises U. S. Military Academy, June 11, 1902.)*

NOTE.—The selection of the superintendents of the Military Academy was confined to the Corps of Engineers from the establishment of the Institution, March 16, 1802, till the passage of the law of July 13, 1866, which opened it to the entire Army. By the act of June 12, 1858, the local rank of Colonel was conferred upon the Superintendent. 1 Major Williams resigned June 20, 1803, on a point of command, and pending its settlement until April 19, 1805, when he again returned to service as Chief Engineer, no permanent Superintendent of the Military Academy was appointed, the command devolving upon the senior officer of the Corps of Engineers present for duty. 2 Bvt. Major P. G. T. Beauregard, Corps of Engineers, by order of John B. Floyd, Secretary of War, relieved Colonel Delafield, Jan. 23, 1861, from the superintendency of the Military Academy, but was himself displaced five days later, Jan. 28, 1861, by direction of the succeeding Secretary of War, Joseph Holt, the command again devolving upon Colonel Delafield.

CLASSIFICATION OF CADETS.

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the *Fourth Class*; those on the second year's course the *Third Class*; those on the third year's course the *Second Class*; and those on the fourth year's course the *First Class*.

The academic year commences on the 1st of July. On, or before, that date the result of the examination held in the preceding month is announced and Cadets are advanced from one class to another. At no other time is a Cadet advanced from one class to another, unless prevented by sickness, or authorized absence, from attending the aforesaid examination; in such a case a special examination is granted; but in no case is a Cadet advanced from one class to another without having satisfied the Academic Board of his proficiency in each branch of study pursued by his class.

*Names marked thus * in the following pages are regarded as distinguished cadets, their total proportional parts on the general merit roll of the class at the close of the term in the preceding June having exceeded ninety-two per cent of the possible total. A complete list of distinguished cadets by classes, and the subjects in which they particularly excel, will be found in the following pages.*

Cadets whose names are marked thus † were found deficient, and turned back, to join the next succeeding class.

Cadets whose names are marked thus ‡ were found deficient, and discharged.

CORPS ORGANIZATION.

For instruction in Infantry Drill and in Military Police and Discipline, the Corps of Cadets is organized into three battalions, under the Commandant of Cadets, assisted by three battalion commanders (army officers), each company being commanded by an officer of the army. Cadet officers and non-commissioned officers are selected from those cadets having the highest rating in Military Efficiency and Conduct. Captains, lieutenants, 1st sergeants and sergeants are selected from the first class and the corporals from the second class.

CORPS ORGANIZATION (Continued)

For instruction in Infantry Drill and in Military Police and Discipline, the Corps of Cadets is organized into three battalions, under the Commandant of Cadets, assisted by three battalion commanders (army officers), each company being commanded by an officer of the army. Cadet officers and non-commissioned officers are selected from those cadets having the highest rating in Military Efficiency and Conduct. Captains, lieutenants, 1st sergeants and sergeants are selected from the first class and the corporals from the second class.

WAR DEPARTMENT.

Information Relative to the Appointment and Admission of Cadets to the United States Military Academy.

1924 Edition. Revised Annually.

[Communications relating to matters connected with the Military Academy should be addressed to The Adjutant General of the Army, Washington, D. C.]

THE CORPS OF CADETS.

The maximum authorized strength of the Corps of Cadets at the United States Military Academy (excepting the four Filipinos) is 1,334, appointed in number and from sources as follows: Four from each State at large; 2 from each congressional district; 2 from each Territory; 4 from the District of Columbia; 2 from natives of Porto Rico; 82 from the United States at large, 2 of whom are appointed upon the recommendation of the Vice President, and 20 of whom are selected from among the honor graduates of educational institutions having officers of the Regular Army detailed as professors of military science and tactics, and which institutions are designated as "honor military schools" upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department; and 180 to be appointed from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable. All cadets are appointed by the President; and those appointed from States at large, from congressional districts, from the Territories, from the District of Columbia, and from the island of Porto Rico, must, under the law, be *actual residents* thereof, respectively.

In addition to the 1,334 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "*Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stats. 441.)

APPOINTMENTS.

The numbers mentioned above represent the maximum allowed at the Military Academy at any one time from the respective sources; consequently, no appointment can be made from any source except to fill a vacancy therefrom.

Appointments are made as follows:

From States at large and from Congressional districts, upon the recommendations of the respective Senators and Representatives in Congress.

From the Territories, upon the recommendations of the respective Delegates in Congress.

From the District of Columbia, upon the recommendations of the commissioners thereof.

From Porto Rico, upon the recommendation of the Resident Commissioner.

From among the honor graduates of educational institutions designated as "honor military schools," upon the recommendations of the heads of the respective schools.

From among the enlisted men of the National Guard of the States and Territories, and of the island of Porto Rico, upon the recommendations of the respective governors thereof.

From among the enlisted men of the National Guard of the District of Columbia, upon the recommendation of the commanding general of the District of Columbia Militia.

From among the enlisted men of the Regular Army, upon the recommendations of the commanding generals of the respective corps areas and territorial departments.

Appointments from the United States at large (excepting those from "honor military schools" and those appointed upon the recommendation of the Vice President) are made by the President upon his own selection, and as the result of a competitive examination, identical in every respect with the regular entrance examination.

CANDIDATES.

From States at large, Congressional districts, and Territories.—The selection of candidates, by competitive examination or otherwise, for appointment from any State at large or congressional district, is entirely in the hands of the Senator or Representative in Congress who has the vacancy at his disposal, and all applications for appointment from those sources should be addressed to the proper Senator or Representative.

For each vacancy from a State at large, or congressional or territorial district, *three candidates* should be nominated, one to be named as *principal*, one as *first alternate*, and one as *second alternate*. The first alternate, if qualified, will be admitted in the event of the failure of the principal; the second alternate, if qualified, will be admitted in the event of the failure of both the principal and the first alternate.

These candidates must, at date of admission, be between the ages of 17 and 22 years.

From "honor military schools."—*Honor graduates* of "honor military schools" are selected for appointment as cadets of the United States Military Academy in the following manner:

There is maintained in the office of The Adjutant General of the Army a roster of "honor military schools" as determined by annual War Department inspections of educational institutions.

At an early date in each year, The Adjutant General of the Army will anticipate the vacancies in the Corps of Cadets which are open to *honor graduates* and will make an equitable distribution of those vacancies amongst the "honor military schools" and notify them accordingly. Each designated institution will at a specified time notify The Adjutant General of the Army of the name of the selected *honor graduate* from that year's graduating class.

An *honor graduate* of a selected institution will be appointed, without mental examination but subject to a satisfactory physical examination, a cadet of the United States Military Academy upon the certificate of the head of the institution that the appointee is the *honor graduate* of that institution. A certificate (Form II) will be forwarded to the adjutant of the Academy when the appointment is made.

These candidates must, at date of admission, be between the ages of 17 and 22 years.

From the National Guard.—To be eligible for appointment from the National Guard, an applicant must be an enlisted man of a unit recognized by the Federal Government and must, at date of admission, be between the ages of 19 and 22 years and have served as an enlisted man in the Guard not less than one year. It is not essential that the service shall have been continuous; therefore, former service in the Guard may be counted in determining an applicant's eligibility. Similarly, service with a National Guard organization prior to its recognition by the Federal Government may be considered, the date of enlistment of the soldier governing, and not that of the recognition of the unit. Those applicants who contemplate enlisting in the National Guard for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

For vacancies in the cadetships allotted to enlisted men of the National Guard, the candidates, not exceeding three for each vacancy, will be apportioned in number as nearly equal as practicable, among the States, the Territories, the District of Columbia, and the island of Porto Rico, according to their enlisted strength. With the exception of the candidates from the District of Columbia, they will be selected by the governors from successful competitors in a PRELIMINARY EXAMINATION to be held between November 1 and November 15 of each year, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy. The candidates from the National Guard of the District of Columbia will be similarly selected by the commanding general of the District of Columbia Militia.

Each candidate thus selected will be authorized by the War Department to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of National Guard candidates, the available vacancies being awarded to those physically qualified candidates making the highest proficient averages in the order of merit established at the last-mentioned examination, irrespective of the State, Territory, or District to which their organizations may belong. The selection being made throughout by competition, alternates can not be considered under any circumstances.

From the Regular Army.—To be eligible for appointment from the Regular Army, an applicant must be an enlisted man thereof, and must, at date of admission, be between the ages of 19 and 22 years, and have served as an enlisted man in the Army not less than one year. It is not essential that the service shall have been continuous; therefore, prior Army service may be counted in determining a soldier's eligibility. Those applicants who contemplate enlisting in the Army for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

The candidates nominated for cadetships allotted to the enlisted men of the Regular Army shall not exceed three times the number of existing vacancies and shall be equitably distributed among the territorial departments and corps areas by the War Department. If the number of applicants in any department or corps area exceeds the share allotted to it by the War Department, the candidates in such department or corps area will be chosen from the successful competitors in a PRELIMINARY EXAMINATION to be held between December 1 and December 15, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy.¹

Each such candidate will be authorized to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of Army candidates, the available vacancies being awarded to those physically qualified competitors making the highest proficient averages, in the order of merit established at the last-mentioned examination, without regard to the territorial department or corps area from which designated. The selection being made throughout by competition, alternates can not be considered under any circumstances.

REGULAR ENTRANCE EXAMINATION.

The regular Military Academy entrance examination is held beginning on the first Tuesday in March each year, only one such examination being scheduled annually. Each candidate (unless appointed from the Regular Army) designated to take that examination will receive from the War Department a letter of appointment, and he must appear for examination at the time and place designated therein, before a board of Army officers convened by the War Department. Enlisted men appointed from the Regular Army receive authority from their respective department or corps area commanders to report for examination, and must report at the time and place specified.²

The Filipino candidates selected for appointment shall, unless otherwise notified by the War Department, appear for mental and physical examination on the second Tuesday in January of each year before a board of Army officers to be convened at such place in the Philippine Islands as the commanding general of the Philippine Department may designate.

EDUCATIONAL QUALIFICATIONS.

There are *two* methods of meeting the educational requirements for admission to the Military Academy, viz, by successfully passing the regular entrance examination, or by submitting a satisfactory educational certificate in lieu thereof.

Admission by examination.—Those appointees who enter by examination must show that they are well versed in algebra, to include quadratic equations and progressions, and in plane geometry, English grammar, composition and literature, and general and United States history.

The schedule of the examination is as follows:

First day.—Report and instructions, 9 a. m. to 11 a. m., 2 hours. History, 1.30 to 5.30 p. m., 4 hours.

¹ In the Philippine Department the preliminary examination will be held between Nov. 1 and Nov. 15.
² The board before which a candidate is directed to appear will be the one convened at the place nearest or most convenient to his home or to the school at which he is in regular attendance.

Second day.—Algebra, 9 a. m. to 1 p. m., 4 hours. English grammar, composition and literature, 1.30 to 5.30 p. m., 4 hours.

Third day.—Geometry, 9 a. m. to 1 p. m., 4 hours.

(For a more complete description of the examination and for sample questions see pp. 12 to 30.)

Admission by certificate.—The Academic Board will consider and *may accept* in lieu of the regular mental examination:

(1) A properly attested certificate (Form II) that the candidate has graduated from a preparatory school or public high school accredited by the United States Military Academy, provided that he has in his school work shown proficiency in subjects amounting to not less than 14 units of the lists given below.

Of the 14 units, 2 must be in algebra, 1 in plane geometry, $1\frac{1}{2}$ in English grammar and composition, $1\frac{1}{2}$ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows evidence of low grades or of graduation at an irregular date, the certificate will be rejected.

(2) A properly attested certificate (Form II) that the candidate is in actual attendance in his senior year at a preparatory school or public high school accredited by the United States Military Academy, and has satisfactorily completed three and one-half years' work at such school, provided that the certificate shows specifically by subjects and units the work already completed and also that to be completed by graduation, and provided that the course which he is pursuing will, when completed, show proficiency in subjects amounting to not less than 14 units of the list given below and that the certificate includes a statement to that effect; also provided that of the 14 units, 2 must be in algebra, 1 in plane geometry, $1\frac{1}{2}$ in English grammar and composition, $1\frac{1}{2}$ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list. If a scrutiny of the certificate submitted shows low grades, it will be rejected.

A candidate submitting a certificate showing actual attendance at and prospective graduation from a preparatory school or public high school must as a condition of admission continue his course of study, and at the time of entrance to the Military Academy submit his diploma or other formal evidence of graduation. Failure to submit such evidence of graduation will disqualify the candidate for entrance.

(3) A properly attested certificate (Form I) that the candidate is a regularly enrolled student in good standing without condition in a university, college, or technical school accredited by the United States Military Academy, provided that the entrance requirements of the course he is pursuing require proficiency in subjects amounting to not less than 14 units of the list given below.

If attendance at college extends over a semester, the full record of academic work at the college, giving subjects taken and grades attained in each, must be submitted on Form I.

Candidates who have taken work in a college or university must submit a certificate, Form I, covering college work. If the college certificate covers one or more complete semesters with grades, it need not be accompanied by a certificate, Form II, covering the candidate's work in high school or preparatory school. If, however, the college certificate, Form I, covers less than one complete semester's work, it must be accompanied by a certificate, Form II, covering the candidates' work in high school or preparatory school. When both college and high school certificates are submitted, they will be considered together.

A certificate indicating enrollment in or admission to an institution at any other time than that specified in the college register for regular admission or enrollment will not be accepted. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

(4) A properly attested certificate (Form III) from the College Entrance Examination Board that the candidate has shown proficiency in the examinations set by the board in subjects amounting to 14 units from the lists given below. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

The lists of subjects and the corresponding weights in units are as follows:

(a) REQUIRED.

Every certificate must show evidence of proficiency in the following subjects:

DEFINITION OF CERTAIN OF THE SUBJECTS CONTAINED IN THE FOREGOING LISTS.

MATHEMATICS.

A1. ALGEBRA TO QUADRATICS. ONE UNIT.

The four fundamental operations for rational algebraic expressions.

Factoring, determination of highest common factor and lowest common multiple by factoring.

Fractions, including complex fractions, and ratio and proportion.

Linear equations, both numerical and literal, containing one or more unknown quantities.

Problems depending on linear equations.

Radicals, including the extraction of the square root of polynomials and numbers.

Exponents, including the fractional and negative.

A2. QUADRATICS AND BEYOND. ONE UNIT.

Quadratic equations, both numerical and literal.

Simple cases of equations, with one or more unknown quantities that can be solved by the methods of linear or quadratic equations.

Problems depending on quadratic equations.

The binomial theorem for positive integral exponents.

The formulas for the n th term and the sum of the terms of arithmetical and geometrical progressions, with applications.

It is assumed that pupils will be required throughout the course to solve numerous problems which involve putting questions into equations. Some of these problems should be chosen from mensuration, from physics, and from commercial life. The use of graphical methods and illustrations, particularly in connection with the solution of equations, is also expected.

B. ADVANCED ALGEBRA. ONE-HALF UNIT.

Permutations and combinations, limited to simple cases.

Complex numbers, with graphical representation of sums and differences.

Determinants, chiefly of the second, third, and fourth orders, including the use of minors and the solution of linear equations.

Numerical equations of higher degree, and so much of the theory of equations, with graphical methods, as is necessary for their treatment, including Descartes' rule of signs and Horner's method, but not Sturm's functions or multiple roots.

C. PLANE GEOMETRY. ONE UNIT.

The usual theorems and constructions of good textbooks, including the general properties of plane rectilinear figures; the circle and the measurement of angles; similar polygons; areas; regular polygons and the measurement of the circle.

The solution of numerous original exercises, including loci problems.

Applications to the mensuration of lines and plane surfaces.

D. SOLID GEOMETRY. ONE-HALF UNIT.

The usual theorems and constructions of good textbooks, including the relation of planes and lines in space; the properties and measurement of prisms, pyramids, cylinders, and cones; the sphere and the spherical triangle.

The solution of numerous original exercises, including loci problems.

Applications to the mensuration of surfaces and solids.

E. TRIGONOMETRY. ONE-HALF UNIT.

Definitions and relations of the six trigonometric functions as ratios; circular measurement of angles.

Proofs of principal formulas, in particular for the sine, cosine, and tangent of the sum and the difference of two angles, of the double angle and the half angle, the product expressions for the sum of the difference of two sines or two cosines, etc.; the transformation of trigonometric expressions by means of these formulas.

Solution of trigonometric equations of a simple character.

Theory and use of logarithms (without the introduction of work involving infinite series).

The solution of right and oblique triangles and practical applications, including the solution of right spherical triangles.

F. PLANE TRIGONOMETRY. ONE-HALF UNIT.

This subject is the same as the preceding except that no topics from spherical trigonometry are included.

ENGLISH A AND B.

The study of English in the school has two main objects: (1) Command of correct and clear English, spoken and written; (2) ability to read with accuracy, intelligence, and appreciation.

GRAMMAR AND COMPOSITION. ONE AND ONE-HALF UNITS.

The first object requires instruction in grammar and composition. English grammar should ordinarily be reviewed in the secondary school; and correct spelling and grammatical accuracy should be rigorously exacted in connection with all written work during the four years. The principles of English composition governing punctuation, the use of words, sentences, and paragraphs, should be thoroughly mastered; and practice in composition, oral as well as written, should extend throughout the secondary school period. Written exercises may well comprise letter writing, narration, description, and easy exposition and argument. It is advisable that subjects for this work be taken from the student's personal experience, general knowledge, and studies other than English, as well as from his reading in literature. Finally, special instruction in language and composition should be accompanied by concerted effort of teachers in all branches to cultivate in the student the habit of using good English in his recitations and various exercises, whether oral or written.

LITERATURE. ONE AND ONE-HALF UNITS.

The second object is sought by means of two lists of books headed, respectively, reading and study, from which may be framed a progressive course in literature covering four years. In connection with both lists, the student should be trained in reading aloud and be encouraged to commit to memory some of the more notable passages both in verse and in prose. As an aid to literary appreciation he is further advised to acquaint himself with the most important facts in the lives of the authors whose works he reads and with their place in literary history.

READING.

The aim of this course is to foster in the student the habit of intelligent reading and to develop a taste for good literature, by giving him a first-hand knowledge of some of its best specimens. He should read the books carefully, but his attention should not be so fixed upon details that he fails to appreciate the main purpose and charm of what he reads.

HISTORY.

(a) **Ancient history**, with special reference to Greek and Roman history, and including also a short introductory study of the more ancient nations and the chief events of the early Middle Ages, down to the death of Charlemagne (814), one unit.

(b) **Mediæval and modern history**, from the death of Charlemagne to the present time, one unit.

(c) **Modern history**, one unit.

(d) **English history**, one unit.

(e) **American history**, one unit.

(f) **American history and civil government**, one unit.

UNIT OF ADMISSION REQUIREMENTS.

In order to facilitate the comparison of admission requirements with one another the board has given its approval to the following statement, formulated by the National Conference Committee on Standards of Colleges and Secondary Schools, descriptive of a unit of admission requirements:

A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work. A four-year secondary-school curriculum should be regarded as representing not more than 16 units of work.

This statement is designed to afford a standard of measurement for the work done in secondary schools. It takes the four-year high-school course as a basis, and assumes that the length of the school year is from 36 to 40 weeks, that a period is from 40 to 60 minutes in length, and that the study is pursued for four or five periods a week; but under ordinary circumstances a satisfactory year's work in any subject can not be accomplished in less than 120 sixty-minute hours or their equivalent. Schools organized on any other than a four-year basis can, nevertheless, estimate their work in terms of this unit. (From Document No. 93, College Entrance Examination Board. Address for further information, 431 West One hundred and seventeenth Street, New York City.)

GENERAL INFORMATION.

Candidates from the United States at large, the Regular Army, and the National Guard may submit certificates, but such certificates will be considered only in case the vacancies from those sources, respectively, for that year are not filled by the admission of candidates who qualified as a result of the regular examination.

Certificates should be submitted not later than February 1. A certificate received between February 1 and the examination will receive consideration, but, in view of the short time left to the academic board to investigate its value, no assurance will be given that such certificate can be acted on in time to exempt the candidate from the mental examination.

Candidates who submit certificates on a date which does not allow the academic board sufficient time to investigate their value and notify them regarding the final action thereon prior to the day set for the examination should proceed with the regular examination.

Candidates who are informed that their certificates have been accepted must present themselves at the regular time and place, as herein prescribed, for physical examination.

A certificate which is accepted as satisfactory for one examination will be regarded as satisfactory for any other examination which may be set for entrance with the same class.

Any certificate accepted for one class and presented for a succeeding class should be accompanied with a full statement of the candidate's educational work in the interim, and both certificate and statement will be subject to careful scrutiny by the academic board. (Par. 57, Regis., U. S. M. A.)

All necessary papers, *including a set of blank certificate forms* (except Form III, which is sent only upon application), are furnished by The Adjutant General of the Army to each duly nominated candidate with his letter of appointment.

Any candidate who contemplates submitting a certificate shall, immediately upon receiving his appointment, forward to the Adjutant, United States Military Academy, West Point, N. Y., the names and addresses of all educational institutions from which he expects to obtain certificates, in order that information as to the status of those institutions may be procured before the arrival of the certificates.

Any appointee who can not accept appointment should so advise The Adjutant General promptly.

Date of admission.—Candidates who fully conform to the requirements set forth in the preceding paragraphs, and who report in person to the superintendent on the first week day in July, before 12 o'clock, noon, shall be admitted as cadets of the United States Military Academy, and shall receive their warrants of appointment as soon as practicable.

Engagement to serve.—Immediately after reporting to the superintendent for admission, and before receiving their warrants of appointment, candidates are required to sign, in the presence of the superintendent, or of some officer deputed by him, engagements for service in the following form:

I, _____, of the State (or Territory) of _____, aged _____ years, _____ months, do hereby engage (with consent of my parent or guardian) that from the date of my admission as a cadet of the United States Military Academy I will serve in the Army of the United States for eight years unless sooner discharged by competent authority.

In the presence of _____.

In the case of the Filipino cadets, the engagement shall be made to serve in the Philippine Scouts. (See sec. 1321, R. S.)

Oath of allegiance.—Each cadet shall, previous to his admission to the Academy, take and subscribe an oath or affirmation in the following form:

I, _____, do solemnly swear that I will support the Constitution of the United States and bear true allegiance to the National Government; that I will maintain and defend the sovereignty of the United States paramount to any and all allegiance, sovereignty, or fealty I may owe to any State, county, or country whatsoever, and that I will at all times obey the legal orders of my superior officers and the rules and articles governing the Armies of the United States. (Sec. 1320, R. S.)

Sworn to and subscribed at _____ this _____ day of _____, nineteen hundred and _____, before me.

No candidate shall be admitted who is less than 5 feet 4 inches in height, or who is deformed or afflicted with any disease or infirmity which would render him unfit for the military service, or who has, at the time of presenting himself, any disorder of an infectious or immoral character.

All candidates must be unmarried.

Candidates are eligible for admission from the day they are 17 (or 19 if from the Regular Army or from the National Guard) until the day they become 22 years of age, on which latter day they are not eligible. The age requirements for all candidates, as well as the service requirements for appointment from the Army and from the National Guard, are statutory and can not be waived.

The mental and physical requirements are the same for all candidates.

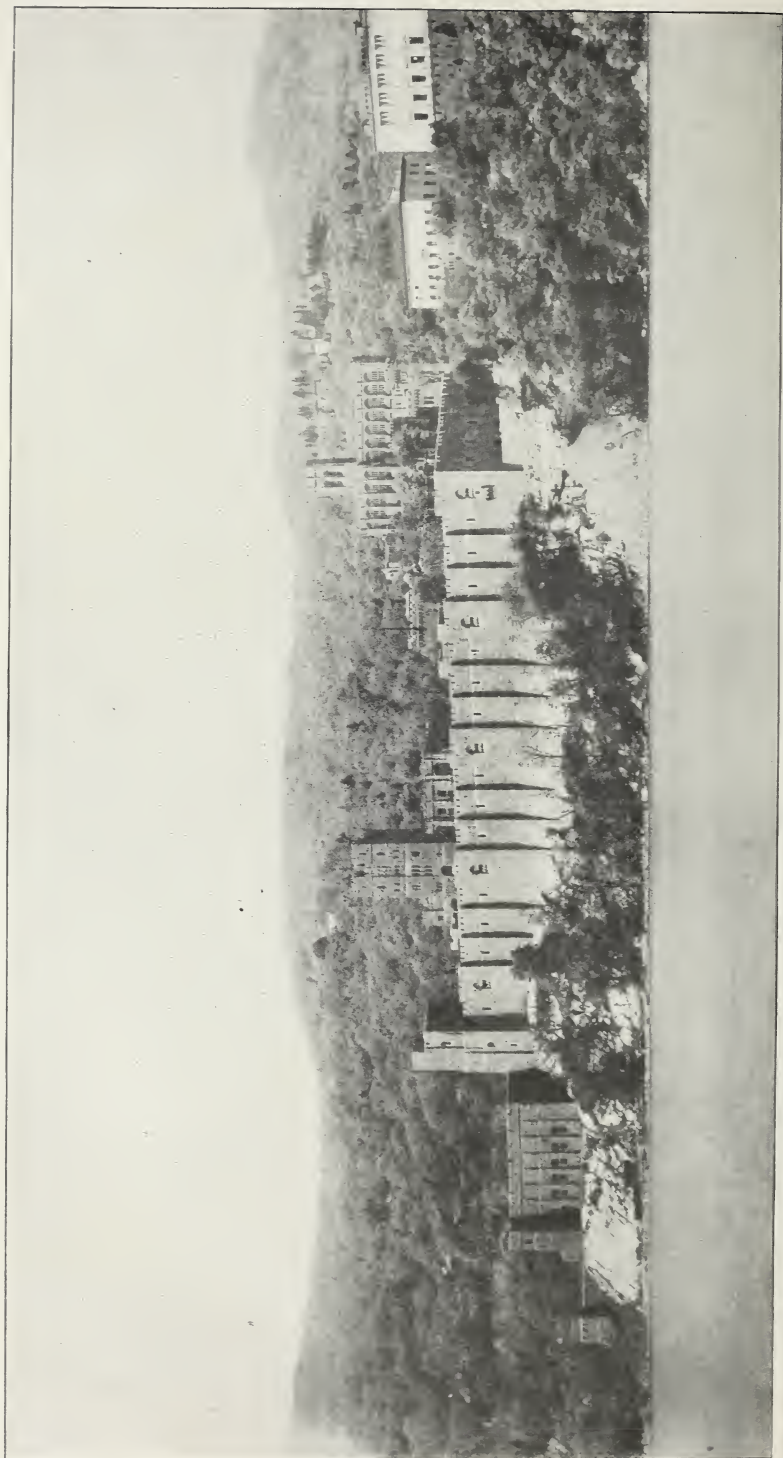

Each candidate must, on reporting at West Point, present a certificate showing successful vaccination within one year; or a certificate of two vaccinations, made at least a month apart, within three months.

PRELIMINARY PHYSICAL EXAMINATION.

Each candidate designated as principal or alternate for appointment as a cadet of the Military Academy should ascertain as soon as practicable whether or not he has any physical defect that would disqualify him for admission or any that should be corrected by treatment before presenting himself for examination. For this purpose he should immediately cause himself to be examined by his family physician, and, if he desires, also by an Army surgeon at

WEST POINT FROM THE CLOUDS.

PARTIAL VIEW OF CENTRAL BUILDINGS FROM HUDSON RIVER.

the nearest military post. Such an examination should enable the candidate to decide whether to devote the time and possible expense which may be necessary for preparation for the entrance examination or to relinquish his appointment.

The presentation by an appointee of his letter of conditional appointment, with a request for physical examination, or the presentation by a prospective appointee of a letter signed by a Member of Congress stating that the bearer is a candidate for cadet appointment and requesting that he be physically examined, will be sufficient authority for an Army surgeon at any military post to make the desired physical examination. Upon completion of this examination, the Army surgeon will inform the candidate of the result, and, in case a disability be found, whether such disability is believed to be permanent and disqualifying for military service, or whether it is believed to be of a temporary or curable nature. The examination is to be regarded as preliminary only and in no manner to affect the decision of the regular medical examining board.

CHARACTER OF ENTRANCE EXAMINATIONS.

PHYSICAL EXAMINATION.

Candidates who, upon reporting, present evidence that they have been excused from the mental examination under the provisions of the certificate privilege, or as the result of having qualified mentally at a previous examination, are usually examined physically as soon as possible after reporting and are not required to wait until the schedule of mental examinations has been completed. The physical examination of all candidates taking the mental examination begins in the afternoon of the third day and is continued daily until completed.

Hearing must be normal (20/20) in each ear for the "low whispered voice." The following-named conditions are causes for rejection: The total loss of an ear, marked hypertrophy or atrophy, or disfiguring deformity of the organ; atresia of the external auditory canal, or tumors of this part; acute or chronic suppurative otitis media, or chronic catarrhal otitis media; mastoiditis, acute or chronic; existing perforation of the membrana tympani from any cause whatever.

Vision as determined by the official test types must not fall below 20/40 in either eye without glasses. If below 20/20, it must be correctable to 20/20 by proper glasses. Hyperopia, hyperopic astigmatism, or compound hyperopic astigmatism, with vision less than 20/20 without glasses is cause for rejection. Both eyes must be free from acute or chronic disease. In the record of all examinations the acuity of vision without glasses, and also with glasses when the acuity is less than 20/20, will be given for each eye separately; in the latter case, the correction will also be noted.

The following-named conditions are also causes for rejection: Manifest disturbance of muscle balance; color blindness for red, green, or violet; trachoma, or xerophthalmia; chronic conjunctivitis; pterygium encroaching upon the cornea; complete or extensive destruction of the eyelids, disfiguring cicatrices, adhesions of the lids to each other or to the eyeball; inversion or eversion of the eyelids, or lagophthalmus; trichiasis, ptosis, blepharospasm, or chronic blepharitis; epiphora, chronic dacryocystitis, or lachrymal fistula; chronic keratitis, ulcers of the cornea, staphyloma, or corneal opacities encroaching on the pupillary area and reducing the acuity of vision below the standard noted above; irregularities in the form of the iris, or anterior or posterior synechiae sufficient to reduce the visual acuity below the standard; opacities of the lens or its capsule, sufficient to reduce the acuity of vision below the standard, or progressive coraract of any degree; extensive coloboma of the choroid or iris, absence of pigment, glaucoma, iritis, or extensive or progressive choroiditis; retinitis, detachment of the retina, neuro-retinitis, optic neuritis, or atrophy of the optic nerve; loss or disorganization of either eye, or pronounced exophthalmus; pronounced nystagmus, or permanent or well-marked strabismus; diplopia, or night blindness; abnormal conditions of the eyes due to disease of the brain; malignant tumors of lids or eyeballs; asthenopia accompanying any ocular defect.

A certificate from a competent ophthalmologist may be accepted, at the option of the examining board, as evidence of freedom from lesions of the fundus.

Teeth.—No candidate will be accepted unless he has a minimum of 6 serviceable, natural masticating teeth above and 6 below, opposing, and 4 serviceable, natural incisors above and 4 below, opposing. Therefore, the minimum requirement consists of a total of 12 masticating teeth and 8 incisor teeth, all of which

must be so opposed as to serve the purposes of incision and mastication. Well-crowned teeth or single-tooth replacements by a standard method of fixed bridge work may be considered serviceable, natural teeth.

A carious tooth with one or more cavities which can be restored by filling may be considered a serviceable, natural tooth, and a candidate with such unsound tooth or teeth may be accepted subject to the conditions of having the cavities filled in a satisfactory manner before the date set for his entrance. Teeth affected by extensive caries with large cavities involving the pulp will not be considered serviceable. A tooth will not be considered a serviceable, natural tooth when it is involved with excessively deep pyorrhea pockets, or when its root end is manifestly affected with an infection that has or has not an evacuating sinus discharging through the mucous membrane or skin; nor will a tooth be considered serviceable which fails to enter into serviceable occlusion with the opposing tooth.

The following-named conditions are further causes for disqualification if found to exist to such a degree as would immediately or at no very distant period impair the efficiency of the candidate:

1. Feeble constitution; unsound health from whatever cause; tuberculosis; indications of former tuberculosis; convulsions; venereal disease; heart disease; kidney disease; chorea; and somnambulism.

2. Chronic cutaneous affections.

3. Severe injuries of the bones of the head.

4. Impediment of speech.

5. Want of due capacity of the chest, and any other indication of liability to a pulmonic disease.

6. Impaired or inadequate efficiency of one or both of the superior extremities on account of fractures, especially of the clavicle, contraction of a joint, deformity, etc.

7. Lateral deviation of the spine from the normal midline of more than 2 inches (scoliosis); curvature of the spine of any degree in which function is interfered with, or in which there is noticeable deformity when the applicant is dressed (scoliosis, kyphosis, or lordosis).

8. Hernia in any locality.

9. A varicose state of the veins of the scrotum or spermatic cord (when large), hydrocele, hemorrhoids, fistulas.

10. Impaired or inadequate efficiency of one or both of the inferior extremities on account of varicose veins, fractures, malformation (flat feet, etc.), lameness, contraction, unequal length, bunions, overlying or supernumerary toes, etc.

11. Ulcers or unsound cicatrices likely to break down.

The requirements of the following tables of physical proportions are minimum for growing youths and are for guidance in connection with the other data of the examination, a consideration of all of which will determine the candidate's physical eligibility. Mere fulfillment of the requirements of the standard tables does not determine eligibility.

The physical requirements should be those of the age at the birthday nearest the time of the examination. Fractions greater than one-half inch will be considered as an additional inch of height, but candidates must be at least 64 inches in height.

Minimum standards of physical proportions for height, weight, and chest measurement for all candidates except Filipinos.

MENTAL EXAMINATION.

Algebra.—Candidates will be required to pass a satisfactory examination in that portion of algebra which includes the following range of subjects: Definitions and notation; the fundamental laws; the fundamental operations, viz: Addition, subtraction, multiplication, and division; factoring; highest common factor; lowest common multiple; fractions, simple and complex; simple, or linear equations with one unknown quantity; simultaneous simple or linear equations with two or more unknown quantities; graphical representation and solution of linear equations with two unknowns; involution, including the formation of the squares and cubes of polynomials; binomial theorem with positive integral exponents; evolution, including the extraction of the square and cube roots of polynomials and numbers; theory of exponents; radicals, including reduction and fundamental operations, rationalization, equations involving radicals; operations with imaginary numbers; quadratic equations; equations of quadratic form; simultaneous quadratic equations; ratio and proportion; arithmetical and geometrical progressions. Candidates will be required to solve problems involving any of the principles or methods contained in the foregoing subjects.

The following sets of questions were used at recent examinations:

MARCH, 1919.

No. 1.—(a) Find the cube root of—
(Wt. 12.)

$$\frac{1}{8}x^6 + \frac{3}{4}x^5y + x^4y^2 - x^3y^3 - \frac{4}{3}x^2y^4 + \frac{4}{3}xy^5 - \frac{8}{27}y^6.$$

(b) Solve $\frac{x-1}{x-2} \cdot \frac{x-2}{x-3} = \frac{x-5}{x-6} \cdot \frac{x-6}{x-7}$

No. 2.—(a) Divide $15a^{\frac{1}{2}} - a^{\frac{1}{2}}b^{\frac{1}{2}} - 6b$ by $3^{\frac{1}{2}}\sqrt{a} - 2\sqrt{b}$.
(Wt. 12.)

(b) Expand and simplify $\left(\frac{1-\sqrt{-3}}{2}\right)^6$.

No. 3.—Find graphically the solution of the sets of equations:
(Wt. 12.)

$$\begin{array}{l} 1^\circ. \begin{cases} -\frac{x}{5} - \frac{y}{8} = 1 \\ y - x = 4.1 \end{cases} \\ 2^\circ. \begin{cases} y - 3x = 0 \\ 2y = 6x + 7 \end{cases} \end{array}$$

No. 4.—(a) Solve $\sqrt{7x+1} - \sqrt{3x+10} = 1$.
(Wt. 10.)

(b) If A runs around a circular track in 40 seconds, how fast must B go in order that they may meet every 18 seconds when going in opposite directions?

No. 5.—Two passengers together have 400 pounds of baggage and are charged, for the excess above the (Wt. 10.) weight allowed free, 40 cents and 60 cents, respectively. If the baggage had belonged to one of them, he would have been charged \$1.50.

How much baggage is one passenger allowed without charge?

No. 6.—(a) Simplify $\frac{m^5 - n^5}{m^3 + n^3} \left(1 - \frac{2n}{m+n}\right)$
(Wt. 12.)
$$1 + \frac{2mn}{m^2 - mn + n^2}$$

(b) The sides of two rectangles, one of which is within the other, are parallel and at equal distances apart. How far apart are the sides if the outer rectangle is 10 centimeters by 14 centimeters and is twice as large as the inner one?
(Answer required to 3 decimal places. Test your answer.)

No. 7.—(a) Deduce the formulæ giving the roots of the quadratic equation $ax^2 + bx + c = 0$. Under what (Wt. 12.) conditions will these roots be 1° equal, 2° real and unequal, 3° numerically equal with contrary signs?

(b) For what values of k will the equation $x^2 - 4kx + 4 = 0$ have equal roots? Find these equal roots.

No. 8.—(a) Write down the general or r th term in the expansion of $(x+y)^n$ by the binomial formula.
(Wt. 10.)

(b) Find the middle terms of $(2a^{-3} - 27a^3)^{\frac{2}{3}}$.

No. 9.—(a) Prove that the repeating decimal $20.202020\dots$ is a geometrical progression and find the limit (Wt. 10.) of the sum of the series as n approaches infinity.

(b) Show that $\frac{x^2 + 3y^2}{2y} > x + y$, unless $x = y$, when x and y are positive real numbers.

MARCH, 1920.

No. 1.—(a) Simplify $[8a-3\{a-(b-a)\}]-4[a-2\{a-2(a-b)\}+b]$.
(Wt. 12.)

(b) Find the highest common factor of $x^4-ax^3-a^2x^2-a^3x-2a^4$ and $3x^3-7ax^2+3a^2x-2a^3$.

No. 2.—Simplify
(Wt. 10.)

$$\frac{x(1-x^2)^{-\frac{3}{2}}}{\sqrt{1-x^2}\sqrt{\left(\frac{1}{\sqrt{1-x^2}}\right)^2-1}}$$

No. 3.—Find graphically the solution of the simultaneous equations.
(Wt. 10.)

$$\begin{cases} 4x+5y=24 \\ 3x-2y=-5. \end{cases}$$

No. 4.—(a) Show that the sum of any fraction and its reciprocal is greater than 2.
(Wt. 10.)

(b) Simplify $\frac{a-mb-n}{\frac{1}{2}c} \div \frac{c-1}{a-2nb-2a}$

No. 5.—A grocer mixes three kinds of coffee. He can sell a mixture containing 2 pounds of the first kind, 9 pounds of the second, and 5 pounds of the third, at 18 cents per pound; or one composed of 6 pounds of the first, 6 pounds of the second, and 9 pounds of the third, at 19 cents per pound; or one composed of 5 pounds of the first, 2 pounds of the second, and 18 pounds of the third, at 22 cents per pound. Find the number of cents in the cost of a pound of each kind.

No. 6.—Solve
(Wt. 10.)

$$\sqrt{x^2-10x+41}-\sqrt{x^2+10x+41}=8.$$

No. 7.—(a) For what values of m will the equation $2mx^2+(5m+2)x+(4m+1)=0$ have its roots 1° real and equal, 2° real and unequal, 3° imaginary?
(Wt. 12.)

(b) When the roots are equal, what are their values?

No. 8.—(a) Write the general or n th term of $(a+b)^n$.
(Wt. 12.)

(b) Expand and simplify

$$\left(\frac{1-\sqrt{-3}}{2}\right)^6$$

No. 9.—Two circles with their centers on the same diameter of a third circle are tangent to each other externally and to the third circle internally. What must be the radii of the two circles in order that the sum of their areas be three-fourths that of the outer circle?

How will the sum of the circumferences of the inner circles compare with the circumference of the outer circle?

MARCH, 1921.

No. 1.—(a) Simplify $\frac{\frac{1}{x}+\frac{1}{y}}{\frac{1}{x}-\frac{1}{y}} \cdot \frac{x^2-xy-2y^2}{x^2+xy-2y^2}$
(Wt. 10.)

(b) Solve $\sqrt{x+4}+\sqrt{2x+6}=\sqrt{7x+14}$

(Test your results.)

No. 2.—Examine the following statements and say what you can as to the truth or falsity of each (i. e., for what values of x , if any, the statement is true):
(Wt. 12.)

- (1) $3(2x+7)+x=7(x+3)$.
- (2) $3-[x-2(3x-4)]=(x+2)^2+x-13$.
- (3) $4(3-2x)-3(2x-2)=3(4-2x)-8(x-1)$.

No. 3.—Solve graphically the following pairs of equations:
(Wt. 12.)

$$1^\circ. \begin{cases} 3x+4y=11 \\ 5x-4y=14 \end{cases} \quad 2^\circ. \begin{cases} 2x+5y=10 \\ 4x+10y=40 \end{cases}$$

No. 4.—(a) Give the meaning of $a^{\frac{1}{2}}$, $a^{-\frac{1}{2}}$ and a° .
(Wt. 12.)

(b) Find the value of $(6)^{\frac{1}{2}}$ to three places of decimals.

(c) Simplify $\frac{7-3\sqrt{5}}{6+2\sqrt{5}}$ and find its value to two places of decimals.

No. 5.—A boy runs a mile race in $6\frac{1}{4}$ minutes; he does the last lap, one quarter of a mile, at a rate 3 miles an hour faster than his rate on the first three laps. Find his pace for the last lap.
(Wt. 10.)

No. 6.—A man sells a certain number of articles at \$3 each above cost price, and receives \$150 from the sale. He sells the remainder, seven more in number than the first set, at \$2 each below cost price and receives \$170. Find the total number of articles.
(Wt. 12.)

No. 7.—(a) If $x_1=-1+\sqrt{-3}$, find the value of x .
(Wt. 10.)

(b) Arrange in order of magnitude:

$$2^3\sqrt{3}, 3\sqrt{2} \text{ and } \frac{1}{2}\sqrt{2}.$$

No. 8.—The sum of three numbers in arithmetical progression is 6. If 1, 2, and 5 are added to the numbers (Wt. 10.) the three resulting numbers are in geometrical progression. Find the numbers.

No. 9.—If a field were made a feet longer and b feet wider, its area would be increased by m square feet; if (Wt. 12.) its length were made c feet less, and its width d feet less, its area would be decreased by n square feet. Find its dimensions.

Extra.—Substitute for No.

(a) Factor: $1^\circ. 9x^4 - 37x^2 + 4.$
 $2^\circ. 36x^2 + 12c - 35.$

(b) At what time between one and two o'clock is the long hand of a clock exactly one minute in advance of the short hand?

MARCH, 1922.

No. 1.—Factor $x^4 - 10x^2 + 9.$

(Wt. 12.)

Find the value of $(x-a)^3 + (x-b)^3 + (x-c)^3 - 3(x-a)(x-b)(x-c)$ when $3x = a + b + c.$

No. 2.—(a) Divide $x^{\frac{1}{2}} - 2 + x^{-\frac{1}{2}}$ by $x^{\frac{3}{2}} - x^{-\frac{3}{2}}.$

(Wt. 12.)

(b) Simplify $\left(\frac{p+qi}{p-qi}\right)^2 - \left(\frac{p-qi}{p+qi}\right)^2$, when $i = \sqrt{-1}.$

What does the expression become when $p = q?$

No. 3.—Solve graphically the equations

(Wt. 10.)

$$\begin{cases} \frac{x}{3} - \frac{y}{6} = \frac{1}{2} \\ \frac{x}{5} - \frac{3y}{10} = \frac{1}{2} \end{cases}$$

No. 4.—One man and two boys can do in 12 days a piece of work which would be done in 6 days by 3 men (Wt. 10.) and one boy. How long would it take 1 man to do it?

No. 5.—Solve the equation $2\sqrt{x+5} - \sqrt{2x+8} = 2.$

(Wt. 10.)

No. 6.—For what values of k are the roots of the equation $x^2 + k(x+1) + 3 = 0$ equal? Real? Complex?

(Wt. 10.)

Find the roots when they are equal.

No. 7.—A, walking 3 miles per hour, leaves a starting point shortly after 5 o'clock when the minute hand (Wt. 12.) of the clock just makes a right angle with the hour hand. B, walking $3\frac{1}{4}$ miles per hour, starts from the same point more than a half hour later, when the minute hand is again making a right angle with the hour hand. When did A and B start? How far has A gone when B overtakes him?

No. 8.—Solve the equations: $y^2 - xy = 15$

(Wt. 12.)

$$x^2 + xy = 14$$

No. 9.—A rock pushed over a cliff falls approximately 16 feet during the first second, 48 feet the next, 80 feet (Wt. 12.) the next, and so on. It strikes the water at the base of the cliff in 10 seconds. Find how far it falls during the 10th second. How high is the cliff? How many seconds has it been falling when it passes a point q feet below the top of the cliff?

Extra.—Substitute for No.

(a) How long will an up and a down train take to pass each other, each being 44 yards long and each traveling 30 miles per hour?

(b) A man spent \$90.00 for cigars. If he had gotten 1 box more for the money, each box would have been \$1.25 cheaper. How many boxes did he buy?

MARCH, 1923.

No. 1.—(a) Factor $64a^3 - 48a^4 + 9.$

(Wt. 12.)

(b) Simplify $(1 + \sqrt{-2})^3 - (1 - \sqrt{-2})^3$

No. 2.—(a) Arrange in order of magnitude $\sqrt[3]{54}$, $3\sqrt[4]{6}$ and $5\sqrt[5]{2}.$

(Wt. 10.)

Find also the product of the three expressions in simplest form as a radical expression and as a decimal fraction to two places of decimals.

(b) Find the value of $x^3 + 4x^2 + x - 1$, when $x = -2^{\frac{1}{2}}.$

No. 3.—Solve graphically the equations

(Wt. 10.)

$$\begin{cases} (a) \begin{cases} x + y = 5.6 \\ x - 2y = -4. \end{cases} & (b) \begin{cases} x - 2y = 4 \\ x - 2y = 6. \end{cases} \end{cases}$$

and interpret the results in each case.

No. 4.—A and B run a race from P to Q and back; the distance from P to Q being 108 yards. The first (Wt. 12.) heat, A reaches Q first and meets B on his return at a point 12 yards from Q. The second heat, A increases his speed by 2 yards a second, and B by 1 yard a second; and now A meets B 18 yards from Q. How many yards per second does each run the first heat?

No. 5.—Find all the roots of the equation

(Wt. 10.)

$$x^3 + 8 = 0.$$

No. 6.—(a) For what values of m are the roots of the following equation real and unequal:
(Wt. 12.)

(b) Solve the equation:

$$mx^2 + mx + 1 = 0?$$

$$\sqrt{x} = 8 - \frac{15}{\sqrt{x}}.$$

No. 7.—Solve
(Wt. 10.)

$$\begin{cases} \frac{3}{x} + \frac{4}{y} - \frac{8}{z} = 15 \\ \frac{5}{x} - \frac{1}{2y} + \frac{2}{z} = \frac{1}{6} \\ \frac{9}{1x} + \frac{3}{y} + \frac{1}{z} = 13 \end{cases}$$

No. 8.—Solve
(Wt. 12.)

$$\begin{cases} x^2 + xy + 4y^2 = 6 \\ 3x^2 + 8y^2 = 14 \end{cases}$$

No. 9.—(a) Find the sum to infinity of the infinite geometrical progression $10 - 6 + \dots$, that is, a progression whose first two terms are 10 and -6 .

(b) An inlet pipe can fill a cistern in 3 hours, and an outlet pipe can empty it in 9 hours. After how many hours will the cistern be filled if both pipes are open one half the time, and the outlet pipe is closed during the second half of the time?

Extra.—Substitute for No.

The radius of the front wheel of a carriage is 6 inches less than that of the rear wheel. If the front wheel makes 80 more revolutions than the rear wheel in going a mile what is the circumference of each wheel to the nearest inch? (Take $\pi = \frac{22}{7}$)

Plane geometry.—Candidates will be required to give accurate definitions of the terms used in *plane geometry*, to demonstrate any proposition of plane geometry as given in the ordinary textbooks, and to solve simple geometrical problems, either by a construction or by an application of algebra.

The following sets of questions were used at recent examinations:

MARCH, 1919.

No. 1.—(a) Theorem: If two sides of a triangle are unequal, the angles opposite are unequal, and the greater angle is opposite the greater side. (Direct proof required.)
(Wt. 10.)

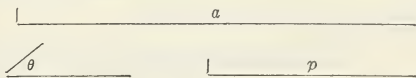

(b) How many sides has a regular polygon whose angle is $165^\circ 36'$?

No. 2.—Theorem: The line joining the mid-points of the opposite sides, and the line joining the mid-points of the diagonals of a quadrilateral, meet in a point.
(Wt. 10.)

No. 3.—Theorem: In the same circle or in equal circles, two central angles have the same ratio as their intercepted arcs (whether these be commensurable or not.)
(Wt. 12.)

No. 4.—Theorem: If two circles intersect, any two parallel straight lines drawn through the points of intersection and terminated by the circumferences are equal.
(Wt. 10.)

No. 5.—Problem: To construct a triangle given the base, a , the angle opposite, θ , and the altitude, p , upon one of the remaining sides.

No. 6.—Theorem: If from a point without a circle a tangent and secant are drawn, the tangent is the mean proportional between the whole secant and its external segment.
(Wt. 12.)

Problem: To construct a circle through two given points a and b and tangent to the given line mn .

No. 7.—Problem: To divide a given line in extreme and mean ratio.
(Wt. 12.)

No. 8.—Theorem: The sum of the squares of the four sides of a quadrilateral is equal to the sum of the squares of the diagonals plus four times the square of the line joining the mid-points of the diagonals.
(Wt. 12.)

No. 9.—(a) Problem: To inscribe a regular hexagon in a given circle.
(Wt. 12.)

(b) Exercise: Find to 3 places of decimals the area of a circle that circumscribes an equilateral triangle whose side is 4.3 meters.

MARCH, 1920.

- No. 1.—(a) How many sides has a polygon the sum of whose angles is 14 right angles?
(Wt. 12.)
(b) Theorem: If two angles of a triangle are unequal, their sides opposite are unequal, and the greater side is opposite the greater angle.
- No. 2.—Theorem: The sum of the perpendiculars drawn from any point within an equilateral triangle to (Wt. 10.) the three sides is constant.
- No. 3.—(a) Distinguish between similar, equivalent, and equal magnitudes, illustrating by figures.
(Wt. 12.)
(b) Problem: A ladder slides down between a vertical wall and a horizontal floor. Find the locus of its mid-point.
- No. 4.—(a) Theorem: Upon a given straight line, to construct the segment of a circle which shall contain a given angle.
(Wt. 12.)
(b) Theorem: AB is a fixed chord of a circle, and P is any point in either arc. Show that the bisector of the angle APB intersects the opposite arc in the same point for all positions of P .
- No. 5.—(a) Theorem: Two triangles are similar if their sides are respectively proportional.
(Wt. 12.)
(b) Problem: To construct a triangle similar to the given triangle and having a given perimeter.
- No. 6.—Theorem: Two rectangles having equal altitudes are to each other as their bases (whether these be (Wt. 12.) commensurable or incommensurable).
- No. 7.—Theorem: Let an equilateral triangle be inscribed in a circle. If the arcs subtended by its sides be (Wt. 10.) bisected, the chords joining these points of bisection will be trisected at the points where they cross the sides of the original triangle.
- No. 8.—Theorem: The sum of the squares of the sides of a parallelogram is equal to the sum of the squares (Wt. 10.) of the diagonals.
- No. 9.—(a) Define a regular polygon.
(Wt. 10.)
(b) Theorem: Given a side and the radius of an inscribed regular polygon, to find a formula for the length of a side of a similar circumscribed polygon.
(c) Example: How many revolutions does a bicycle wheel 28 inches in diameter make in going 1 mile? How many square inches are there in the area of the wheel?

MARCH, 1921.

- No. 1.—(a) Define and illustrate: (1°) a *sector* of a circle, (2°) a *segment* of a circle.
(Wt. 12.)
(b) What proportion of a circle is a sector whose angle is 60° ?
(c) The cross-section of a gutter is a semicircle whose diameter is 1 foot. A stream of water running through the gutter has a width of 6 inches at the surface. Find the area of the cross-section of the stream.
- No. 2.—(a) Theorem: The difference of the squares described on two straight lines is equivalent to the (Wt. 12.) rectangle whose sides are respectively the sum and the difference of the two straight lines.
(b) State the above theorem by an algebraic formula.
(c) Prove geometrically the statement of the algebraic formula $(a+b)(a+2b) = a^2 + 3ab + 2b^2$.
- No. 3.—(a) When is an angle inscribed in a circle?
(Wt. 12.)
(b) Theorem: An inscribed angle is measured by one-half its intercepted arc.
(c) Prove that, if the angle subtended by a chord is 150° , the chord is equal to the radius.
- No. 4.—Prove the following theorem:
(Wt. 10.) Two triangles having an angle of the one equal to an angle of the other are to each other as the products of the sides including the equal angles.
- No. 5.—A shore line, XY , is a straight line: B and C are two buoys fixed not far from the shore. Show (Wt. 10.) how to determine at what point on the shore the straight line BC subtends the greatest angle. (AID: Construct a circle through B and C and tangent to XY .)
- No. 6.—To inscribe a regular hexagon in a given circle and find its area.
(Wt. 12.)
- No. 7.—Prove that if two circles intersect, their common chord bisects their common tangent.
(Wt. 10.)
- No. 8.—Problem: To construct a triangle having given the angles and the radius of the circumscribed circle.
(Wt. 12.)
- No. 9.—Two parallel tangents are drawn to a circle, and a third tangent is drawn intersecting these two in (Wt. 10.) A and B , and tangent to the circle at C . Prove that the product of the segments AC and CB is equal to the square of the radius of the circle.

Extra.—Substitute for No.

Theorem: AD bisects the angle A of the triangle ABC , meets BC in D and the circumscribed circle of the triangle in O .1°. Prove that the triangles ADC and ABO are similar.2°. Prove that $AB \cdot AC = AD^2 + BD \cdot DC$.

MARCH, 1922.

No. 1.—(a) Distinguish between similar, equivalent and equal magnitudes in geometry.

(Wt. 10.)

(b) Each angle of a regular polygon is $157^{\circ}.5$. How many sides has the polygon?

No. 2.—Theorem: The bisector of an angle is the locus of all points within the angle equally distant from its sides.

No. 3.—Problem: To construct all the common tangents to two given nonintersecting circles.

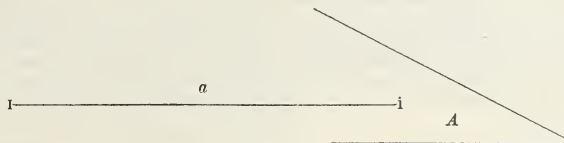

(Wt. 10.)

No. 4.—(a) Theorem: The angle between two chords which intersect within a circumference is measured (Wt. 12.) by (Complete statement of theorem and prove it.)

(b) Exercise: An arc contains 16° ; at its extremities tangents are drawn. What kind of a triangle do they form with the chord, and how large is each angle of the triangle?

No. 5.—Problem: To find the locus of the centroid (or intersection of the medians) of a triangle whose base (Wt. 10.) is a and whose vertical angle is A .

(Hint: Through the centroid draw parallels to the sides that form the angle A . Show that the triangle thus formed has a constant base.)

No. 6.—(a) Problem: Find the lengths of the tangents drawn from a point to a circle whose radius is 13 (Wt. 12.) cm. when the chord joining the points of tangency is 24 cm.

(b) Problem: Given an inch scale. To construct segments equal to $\sqrt{1}$, $\sqrt{2}$, $\sqrt{3}$, $\sqrt{4}$, $\sqrt{5}$.

No. 7.—(a) Theorem: The area of a triangle is equal to

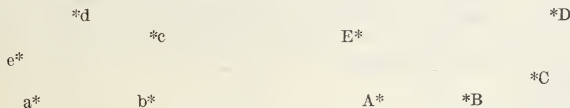

(Wt. 12.) (Complete statement and prove.)

(b) Theorem: The areas of similar triangles are to each other as the squares on homologous sides.

No. 8.—(a) Define similar polygons.

(Wt. 12.)

(b) To construct a polygon similar to abcd an equivalent to ABCDE.

No. 9.—Exercise: Given a regular octagon inscribed in a circle whose radius is one. Compute the actual (Wt. 12.) error and percentage of error made in taking the area of the octagon for the area of the circle.

Extra.—Substitute for No.

Exercise: Given a triangle whose sides are 3, 5, and 7. Find the length of the median and of the angle-bisector drawn from the vertex opposite to the side 7.

MARCH, 1923.

No. 1.—(a) Define: a parallelogram; a rhombus.

(Wt. 10.)

(b) Theorem: The bisectors of the exterior angles of a rhombus inclose a rectangle.

No. 2.—Theorem: The perpendiculars from the vertices of a triangle to the opposite sides meet in a point.

(Wt. 10.)

No. 3.—Problem: To find the locus of the intersection of the diagonals of the parallelogram formed by drawing lines from any point in the base of a triangle parallel to the other two sides.

No. 4.—(a) Theorem: An inscribed angle is measured by half its intercepted arc.

(Wt. 12.)

(b) Exercise: What angle is formed by a secant drawn through the center of a circle and a tangent, if one of the arcs intercepted is 29° ?

No. 5.—Problem: To construct a triangle, given a base AB equal to four inches; an angle opposite the base, (Wt. 10.) C , equal to 30° ; and the point D , where the bisector of the angle C cuts the base, at a distance one inch from A .

No. 6.—Theorem: The common internal tangents to two unequal nonintersecting circles intersect on the (Wt. 12.) line joining their centers.

No. 7.—Exercise: Find the area of a circle inscribed in a square whose side is 40 feet. (Give answer to (Wt. 12.) nearest tenth of a foot.)

Theorem: Four times the sum of the squares of the medians of any triangle is equivalent to three times the sum of the squares of the sides.

No. 8.—Problem: To construct a square whose area shall be 23 the area of the square whose side is 5 (Wt. 12.) inches.

(Explain construction clearly, no proof required.)

No. 9.—Theorem: The area of a regular hexagon inscribed in a circle is a mean proportional between the area of the (Wt. 12.) inscribed and circumscribed equilateral triangles.

Extra.—Substitute for No.

Exercise: The sides about the right angle of a right-angled triangle are 3 meters and 4 meters. Determine to within a centimeter:

- 1° The hypotenuse and corresponding altitude.
- 2° The projections of the given sides on the hypotenuse.
- 3° The radii of the inscribed and circumscribed circles.
- 4° The segments of the hypotenuse determined by the bisector of the right angle.
- 5° The length of the bisector of the right angle.

English grammar.—Candidates must have a good knowledge of *English grammar*; they must be able to define the terms used therein; to define the parts of speech; to give inflections, including declension, conjugation, and comparison; to give the corresponding masculine and feminine gender nouns; to give and apply the ordinary rules of syntax.

They must be able to parse correctly any ordinary sentence, giving the subject of each verb, the governing word of each objective case, the word for which each pronoun stands or to which it refers, the words between which each preposition shows the relation, precisely what each conjunction and each relative pronoun connects, what each adjective and adverb qualifies or limits, the construction of each infinitive, and generally to show a good knowledge of the function of each word in the sentence.

They must be able to correct in sentences or extracts any ordinary grammatical errors.

It is not required that any particular textbook shall be followed; but the definitions, parsing, and corrections must be in accordance with good usage and common sense.

The following sets of questions were used at recent examinations:

MARCH, 1919.

No. Wt.

1. (a) 10.—Write a sentence containing: (a) A verb in the infinitive mood. (b) A conjunction expressing concession. (c) A relative pronoun. (d) The past participle of a verb. (e) A transitive verb with its object.

(b) 5.—Define, and give an example of, each of the following grammatical terms:

Possessive case (of a pronoun).
Comparative degree (of an adverb).
Passive voice.
Intransitive verb.
Prepositional phrase.

2. 20.—Write a compound sentence containing two clauses related by contrast.

Write a complex sentence containing an adverbial clause of purpose.

Write a sentence containing a noun (or substantive) clause used as the subject of the sentence.

Write a compound sentence containing clauses related by alternation.

Write a complex sentence containing an adverbial clause of condition.

3. 40.—Parse the words in italics in the following sentence:

There is nothing that more betrays a base, ungenerous spirit, than the giving of secret stabs to a man's reputation. Hence I am much troubled when I see the talents of humor and ridicule in the possession of an ill-natured man.

Wt.	Wt.	Wt.	Wt.
3. is	3. base	3. much	3. ill-natured
4. nothing	3. than	3. troubled	
3. more	3. giving	4. when	
3. betrays	2. man's	3. in	

4. 15.—Write sentence containing the following:

The preterite (or past) tense (active voice) first person plural of the verb "strike."

The perfect tense (active voice) third person plural of the verb "sell."

The future tense (active voice) second person plural of the verb "hang."

The future tense (passive voice) third person singular of the verb "do."

The present participle of the verb "admit."

The perfect participle of the verb "fly."

The perfect infinitive of the verb "see."

The future perfect tense (passive voice) second person singular of the verb "tell."

The present infinitive of the verb "contain."

The pluperfect (or past perfect) tense (passive voice) third person singular of the verb "fling."

5. 10.—Rewrite the following sentences, correcting all errors:

Between you and I, I think the sick man is feeling very good.

"You hadn't ought to do it," I said, and added, "Neither Harry or I will take the blame for the consequences."

The dogs were laying close by the fire, just where they laid when we first seen them.

I'm sure he don't know who we were talking about.

Any one of a dozen boys are able to pass this examination.

MARCH, 1920.

1. 4.—(a) Write the plural of the following words:

1. key	3. stiletto	5. eyetooth	7. it
2. alkali	4. life	6. index	8. foot
- 4.—(b) Indicate the number of the following nouns by underlining once, those that are singular; twice, those that are plural; thrice, those that may be either:

1. pliers	3. deed	5. women	7. data
2. children	4. analysis	6. sheep	8. cherubim
2. 4.—(a) Write the feminine form of the following words:

1. negro	3. bachelor	5. nephew	7. lord
2. hero	4. male	6. sire	8. boar
- 3.—(b) Indicate the gender of the following nouns by underlining once, those that are masculine; twice, those that are feminine; thrice, those that are neuter; and four times those that are common gender:

1. knowledge	2. mare	3. monk	4. buck	5. servant	6. goose
--------------	---------	---------	---------	------------	----------
3. 15.—With regard to the sentences below state the following: (a) Whether simple, complex or compound; (b) if complex, the kind or nature of subordinate clause relationship; (c) if compound, the kind or nature of relationship between the coordinate clauses.

We waited until the tide came in.
 Though I admire his courage, I have little confidence in his integrity.
 Knowledge comes, but wisdom lingers.
 That honesty is the best policy is a mistaken conception of honesty.
 The man who just struck out is the best batter on the team.
4. 20.—Write sentences containing the following:

The preterite (or past) tense (active voice) third person singular of the verb "dare."
 The perfect tense (active voice) second person plural of the verb "lay."
 The pluperfect (or past perfect) tense (active voice) first person singular of the verb "lie."
 The future perfect tense (active voice) third person plural of the verb "run."
 The present infinitive of the verb "think."
 The present participle of the verb "swim."
 The perfect infinitive of the verb "sing."
 The perfect participle of the verb "drink."
 The future tense (passive voice) of the verb "choose."
 The pluperfect (or past perfect) tense (passive voice) of the verb "find."
5. 5.—(a) Rewrite the following sentences, correcting all errors:

Neither he nor she are here.
 Every one opened their window.
 He don't seem to appreciate those kind of songs.
- 5.—(b) Fill in the blank spaces in the following sentences, using properly one of the words bracketed after the sentence:

The formal statement of the teachings and rules.....set forth in the constitution [is, are].
 This money comes from Boyle..... you know is very liberal [who, whom].
 He refused to pardon Mackey.....he had every reason to believe the police had caught red-handed [who, whom].
6. 10.—Punctuate and capitalize the following:

a glass he said hoarsely and then paused and repeated it more clearly a glass for christmas surely not and why not cried the dealer why not a glass

 From the lines above, pick out the following constructions, indicating in each instance the number of the line, and writing out the word:

Two participles used as descriptive adjectives;
 Five common nouns in the singular number;
 Five prepositions;
 One descriptive adjective;
 One relative pronoun;
 Two verbs in the indicative mood;
 One relative adverb (or conjunctive adverb).
3. 10.—Define and give an example of each of the following: (a) Common noun; (b) indefinite pronoun; (c) adverb; (d) neuter gender; (e) passive voice.
4. 10.—Write sentences containing the following:

(a) The present subjunctive passive first person singular of *allow*.
 (b) The superlative of *little*.
 (c) A relative pronoun in the possessive case.
 (d) An adverb of degree.
 (e) A subordinate conjunction.
 (f) A demonstrative pronoun.
 (g) The plural of *chimney*.
 (h) An interrogative adverb.
 (i) Two interjections.

In parsing give no rules, declensions, comparisons or principal parts of verbs, but in other respects parse fully. Be careful to give, in each example, the name of the part of speech. Give the following information:
Verbs.—Regular or irregular, transitive or intransitive, subject, object, mood, voice, tense, number, person.

Nouns.—Kind, number, person, case, construction.

Pronouns.—Kind, antecedent, gender, number, person, case, construction.

Adverbs.—Kind, degree, word qualified.

Adjective.—Kind, degree, word qualified.

Directions.—(a) Give the governing word of each *objective case*.

(b) State precisely what each conjunction and each *relative pronoun* connects.

(c) State between what words each *preposition* shows the relation.

NOTE.—The words must be parsed in the precise form in which they are given in the vertical column; that is, two or more numbers must *not* be parsed together, but *each number separately*, and whenever possible without the aid of words supplied or understood. Omission of any one of the above requirements will be taken to indicate ignorance. Intelligible abbreviations are allowed.

ANNUAL PHYSICAL EXAMINATION OF CADETS.

All cadets are examined physically in May of each year, and those found physically disqualified to continue with the course or, in case of the first class, for commission in the Army, are discharged.

VACATIONS AND LEAVES OF ABSENCE.

Academic duties are suspended from the completion of the June examinations until the end of August. During this period cadets are engaged in military duties and exercises and in receiving practical instruction in military and other subjects. Academic duties are also suspended from December 24 until January 2, except for those undergoing examination. All duties and exercises, as far as practicable, are suspended on New Year's Day, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and Christmas Day.

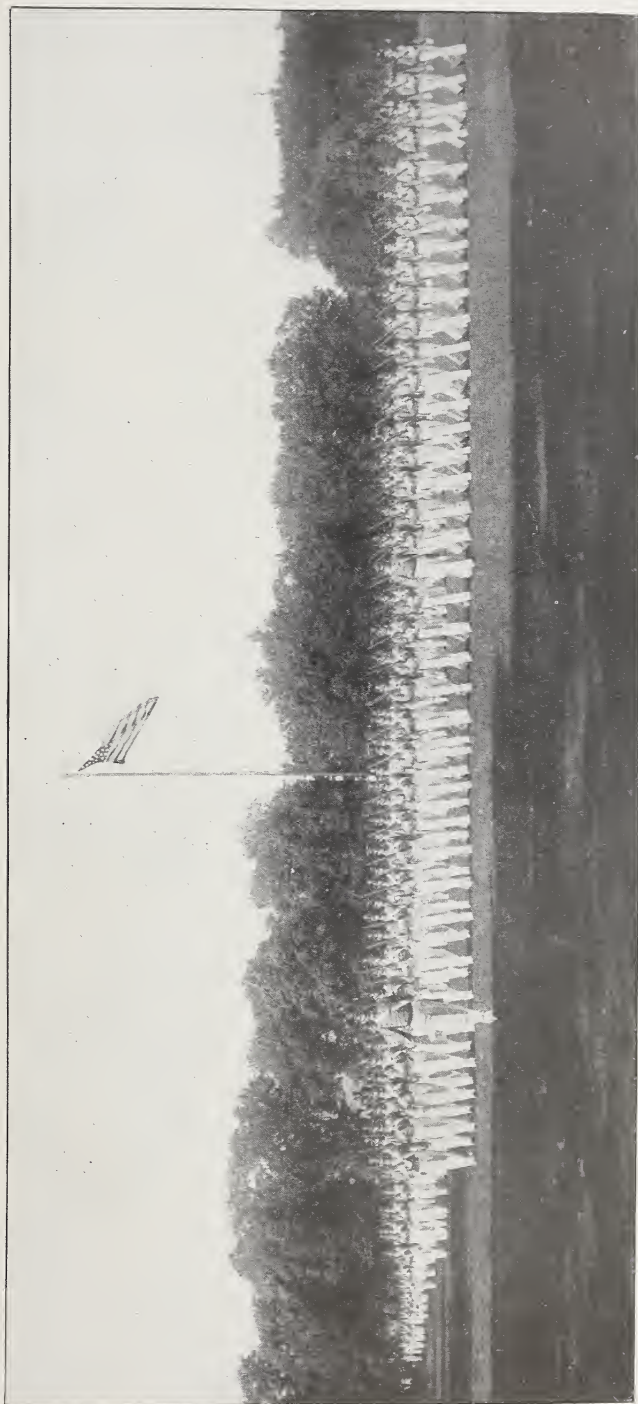

Cadets of the first, second, and third classes not undergoing examinations are allowed leaves at Christmas. Week-end or holiday leaves are granted, not oftener than once each calendar month, to cadets of the first class, provided this privilege does not interfere with academic or military duty and is warranted by their disciplinary and academic records and money accounts. Excepting such leaves, cadets under ordinary circumstances are allowed but one leave of absence during the four-year course. This leave is granted to those cadets who have successfully completed the third-class course of study and extends from the middle of June to the 28th of August.

THE CORPS AT REVIEW.

PAY OF CADETS.

The pay of a cadet is \$780 per year and commutation of rations at 80 cents per day, to commence with his admission to the academy. The total is \$1,072.

Mileage, at 5 cents per mile, while proceeding from his home to the Military Academy is credited to the account of each cadet after his admission to the Academy.

A cadet's initial deposit, together with his salary, is sufficient, with due care and economy to meet his actual needs at the academy. It is not sufficient, however, to meet, in addition, the expenses of leave of absence, especially if these involve considerable travel.

Obtaining money from outside sources, is regarded with disfavor, unless it be for the purpose of liquidating indebtedness at the cadet store or of defraying the expenses of a leave of absence.

Candidates should bring with them the following-named articles, minimum number indicated: Hairbrush, nailbrush, toothbrush, comb, 8 drawers (summer), 12 handkerchiefs (white), 4 nightshirts or pajamas, 8 socks (black cotton), 6 bath towels, 6 face towels, 1 trunk locker or steamer trunk, 8 undershirts (summer), whisk broom, razor and shaving materials, winter underwear (optional), and 1 pair of high black shoes in good condition, properly fitted, and of comfortable size.

Cadets are required to wear the prescribed uniform. All articles for their uniform are of a designated pattern, and are sold to cadets at West Point at regulated prices.

DEPOSIT PRIOR TO ADMISSION.

Immediately after admission each candidate must be provided with an outfit of uniform, etc., the cost of which is about \$250. This sum, or an amount which, in addition to the mileage allowance mentioned above, will equal \$250, must be deposited with the treasurer of the academy before the candidate is admitted. It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the treasurer, United States Military Academy. The deposit is credited at once to the cadet's account. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the treasurer of the academy to purchase his uniform and equipment as an officer.

PROMOTION AFTER GRADUATION.

The act of Congress approved May 17, 1886, to regulate the promotion of graduates of the United States Military Academy provides "That when any cadet of the United States Military Academy has gone through all its classes and received a regular diploma from the academic staff, he may be promoted and commissioned as a second lieutenant in any arm or corps of the Army in which there may be a vacancy and the duties of which he may have been adjudged competent to perform." The act approved June 4, 1920 (National Defense Act), section 24e, provides: "Appointment of officers.—Except as otherwise herein provided, appointments shall be made in the grade of second lieutenant, first, from graduates of the United States Military Academy."

ACADEMIC DUTIES.

There are two terms of academic instruction: September 1–December 23, and January 2–June 4. A semiannual examination is held December 26–31, and an annual examination June 5–12. At the December examination cadets who are found to be proficient in subjects they have completed during the preceding term are arranged according to merit in each subject. At the June examination they are similarly arranged and they are also assigned general standing in the class as determined by their standings in the various subjects. When a subject of study is completed during a term an examination concluding the work in that subject is sometimes held. Cadets deficient in studies at any examination are discharged from the academy unless for special reasons the academic board recommends otherwise. Cadets exceeding at any time the maximum number of demerits allowed for six months are reported to the academic board as deficient in conduct.

THE FOUR-YEAR COURSE OF INSTRUCTION

DEPARTMENT OF TACTICS.

New cadets.—New cadets report for duty at the Military Academy on July 1. They are quartered separately from the corps and are given intensive training in Infantry recruit instruction and military courtesies, and a course of corrective and upbuilding physical training.

After approximately one month of the above training the new cadets join the corps for military formations, but remain in their separate quarters. The remainder of the first summer is devoted to basic training in the technique of Infantry and Field Artillery.

At the end of the first summer the fourth class (new cadets) is fully incorporated into the corps. The military training during the remainder of the year carries on the basic instruction in Infantry and Field Artillery.

Third class.—The military training in the third class year continues the basic instruction, taking up Coast Artillery, riding and Cavalry training, signal communications, field engineering, and motors.

Second class.—The second class is absent during the summer. The remainder of the year is utilized to complete and review the basic instruction of the first two years and to take up the subject of minor tactics.

First class.—The first class year is devoted primarily to developing qualities of command, instruction in minor tactics of separate and combined arms, and imparting information of a general nature that officers should have. In other words, the basic training having been completed, cadets are now given the necessary instruction to fit them to exercise the functions of the lowest grade of any branch in which they may be commissioned, with particular attention to methods of training.

All classes.—Instruction in swimming and dancing begins in the fourth class year and continues for each cadet until he is declared proficient. Practical instruction in fencing, gymnastic exercises, boxing, wrestling, swimming, and all forms of athletics is given to all classes.

Instruction in equestration is given to the first, second, and third classes throughout the academic year.

Special emphasis is given musketry, and each cadet is required to fire qualification courses with rifle and pistol. The purpose of this work is twofold: (1) To develop good shots and (2) to give instruction in methods of training.

DEPARTMENT OF CIVIL AND MILITARY ENGINEERING.

Surveying—The course in surveying is required of all cadets of the fourth class. It comprises 40 periods in the spring term.

The instruction is both theoretical and practical. The theoretical instruction includes the theory and use of chain and tape, compass, transit and stadia, level and level rod, orientation, triangulation, profile and differential leveling, computation and plotting, and the surveying methods applicable to map making.

A short time is devoted to the theory and application of the slide rule, which is used in calculations.

The practical instruction consists in the use of the surveying instruments in making maps, laying out of roads, staking out buildings for construction, and laying out of camps.

Textbooks: Surveying, by Breed & Hosmer; The Slide Rule, by Alexander.

Civil engineering.—This course is required of all cadets of the first class. It comprises 95 periods, beginning October 26.

The instruction is theoretical, being illustrated by lectures and engineering models. It includes the mechanics of engineering and the application of the principles of engineering to engineering structures, as dams, walls, roads, railways, bridges, water supply, etc.

Textbook: Civil Engineering, by Fieberger.

A *special course in bridge design* is given in 10 periods of the spring term to those cadets who have shown a marked proficiency in civil engineering.

Textbook: Structural Steel Drafting and Elementary Design, by Conklin.

Mechanical engineering.—This course is required of all cadets of the first class. It comprises 60 periods, beginning about the middle of the spring term.

The instruction is theoretical, being illustrated by lectures and mechanical engineering models, and by visits to the power plants of the post. It includes the elements of mechanism, sources and utilization of mechanical power, theory of engines, and methods of power transmission.

Textbooks: Power and Power Transmission, by Kerr; Motor Vehicles, by Frazer and Jones.

Fortification.—This course is required of all cadets of the first class. It comprises 24 periods in the spring term.

Four periods of instruction are devoted to study of the theory of fortifications; and the remainder of the course is devoted to lectures and practical problems in fortification. The theory includes the evolution of fortification and the principles of laying out and methods of construction of defenses; the problems are devoted principally to fortification by units not larger than a company; the lectures cover the history of the important field and permanent fortifications in past wars and the developments from one type to another, with the lessons learned from their use in war.

Textbooks: Elements of Fortification, by the department of engineering; Fortification, by the department of engineering.

Army engineering.—This course is required of all cadets of the first class. It comprises 20 periods in the spring term.

The instruction is theoretical, and is illustrated with models of military engineering constructions.

The instruction is devoted to the application of the principles and practice of civil and mechanical engineering to military conditions. It comprises military mapping, military roads and railways, construction of military shelters, military ports and terminals, siege works, camouflage, demolitions, military bridges, and the applications of gas engines to the needs of the military service in different branches of the United States Army.

Textbook: Army Engineering, by the department of engineering.

DEPARTMENT OF NATURAL AND EXPERIMENTAL PHILOSOPHY.

SECOND CLASS.

The course in natural and experimental philosophy extends throughout the second class year. The slide rule, precision of measurements and graphical methods, elementary mechanics and properties of matter, wave motion, sound, and light, in the order named, are taught during the first term. Technical mechanics is taught during the greater part of the second term. This subject is followed by short courses in hydraulics, aerodynamics, and general astronomy, in the order mentioned.

Numerous lectures by the head of the department and visiting scientists are given during the course. In addition to many demonstrations in the section rooms, approximately 30 formal laboratory experiments are performed.

In all there are 225 recitation periods, each of 1 hour and 25 minutes duration, six attendances per week. Each laboratory period is of 2 hours duration.

The entire course in so far as the subjects undertaken are concerned, besides being of general educational value and training, is intended as a thorough preparation for engineering and technical subjects taught during the first class year.

A brief statement of the courses given and of the textbooks used follows:

FIRST TERM.

The slide rule.—Two periods only, based on "Notes on the Slide Rule" prepared in the department. This short course is intended as a refresher course following theoretical instruction given in another department during the fourth class year. Following these two days' instruction on the practical use of the slide rule and after about two weeks' use in the section room, appropriate use of the slide rule for computations in the department is obligatory.

Precision of measurements and graphical methods.—Approximately eight periods are devoted to this subject, which is presented in "Notes on Precision of Measurements and Graphical Methods," prepared in the department and based on the text "Precision of Measurements and Graphical Methods"—Goodwin, 1919 edition. In addition to the theoretical instruction, three or four laboratory exercises are presented in this subject.

General physics.—Seventy periods in all. The subjects of elementary mechanics, properties of matter, wave motion, sound and light, only, in general physics are assigned to this department. The text used is "General Physics"—Ferry—and the subjects enumerated are given to the extent they are covered in that text. In addition numerous original problems are presented and solved. Laboratory apparatus is used for the qualitative demonstration of practically every principle covered in these subjects. Numerous formal laboratory exercises are likewise given as a part of this course.

Upon completion of the advance and partial review of the above-described work a written general review of approximately 15 periods is given, followed by the semiannual examination. This completes the work of the first term.

SECOND TERM.

Technical mechanics.—Seventy periods. The text used is "Technical Mechanics"—Maurer. The upper part of the class takes the entire text. The lower part of the class omits certain selected problems and portions of the text, including articles 53 to 58. Numerous original problems are presented in addition to those given in the text. In connection with this subject several laboratory exercises of a more or less advanced nature are presented.

Hydraulics.—Approximately 20 periods. The text used is "Textbook on Hydraulics"—Russell. The upper part of the class takes the entire text. The lower part of the class usually omits Chapter IX and certain of the more difficult problems.

Aerodynamics.—Fifteen periods. "The Airplane"—Bedell, is used as a text and is supplemented by various Air Service information circulars, aeronautical magazines, and reports of the Advisory Committee for Aeronautics. The entire text is taken, and is supplemented by approximately 40 original problems.

Astronomy.—Twelve periods. The text used is "An Introduction to Astronomy"—Moulton. This course is conducted as a combination reading and lecture course. A portion of each period is devoted to a lecture in which full use is made of astronomical slides. The remainder of the period is devoted to conferences and quizzes. The entire text is covered.

Upon completion of the advance and partial review of the work indicated above a written general review of approximately 12 periods is given, followed by the annual examination. This completes the work of the second term.

DEPARTMENT OF MATHEMATICS.

THIRD AND FOURTH CLASSES.

The course in mathematics begins with the fourth-class year and continues through the third-class year.

In the fourth-class year algebra is completed in alternation, first with geometry, then with trigonometry. Plane analytical geometry is begun.

In the third-class year plane and solid analytical geometry and descriptive geometry are completed in alternation. The calculus and least squares finish the course.

The course in algebra covers the entire subject as generally taught in colleges, but the student is expected to have already mastered elementary algebra to include the progressions and the solution of the quadratic equation. Elementary geometry includes the books that relate to the plane and those that relate to space, but the student is expected to have mastered the former. Trigonometry includes the complete solution of plane and spherical triangles. Analytical geometry includes the discussion of the general equation of the second degree in the plane and the particular forms of the equation of the second degree in space.

Descriptive geometry includes the orthographic projections of the right line, the plane, ruled surfaces and surfaces of revolution, tangent planes and intersection of surfaces. It also takes the subjects of shades and shadows, perspective, isometric projections and spherical projections.

The course in differential and integral calculus covers the ground of the usual college textbook, including briefly the subject of ordinary differential equations. The method of least squares, given to selected sections, includes the deduction of the facility curve, the formulæ for the error, and the distribution of error.

Textbooks.

Elements of Geometry.—Phillips and Fisher.	Elements of Analytical Geometry (Solid).—Smith and Gale.
Complete Secondary Algebra.—Fisher and Schwatt.	Coordinate Geometry.—Fine and Thompson.
Advanced Course in Algebra.—Wells.	Descriptive Geometry.—Church.
Elements of Plane and Spherical Trigonometry.—Crockett.	Linear Perspective.—Pillsbury.
Logarithmic Tables.—Newcomb.	Differential and Integral Calculus.—Granville.
Analytic Geometry (Plane).—Ziwet and Hopkins.	Integral Calculus.—D. A. Murray.
	Method of Least Squares.—Johnson.

DEPARTMENT OF CHEMISTRY, ETC.

SECOND CLASS.

This department embraces the subjects of chemistry, heat, and electricity.

The course begins September 1 of the third academic year and extends throughout this year; exercises, recitations, laboratory work, or lectures take place on all week days.

Commencing September 1, general chemistry and heat occupy the time until the close of the term in December, recitations or other exercises being had daily.

During this term all members of the class whose progress, as shown by their recitations, warrants it, are given laboratory practice in chemistry. This practice begins with chemical manipulations and proceeds in the usual general order of elementary laboratory work. The laboratory exercises are two hours long. It is generally possible to give all parts of the class some laboratory experience; the amount of this work however, varies with the aptitude of the student from a few hours to 30 or more.

This term closes with an examination upon the essential parts of the entire course, which all cadets who have not shown a required proficiency in daily work must take.

The course in heat is short, but it is a comprehensive elementary course intended to embrace what is most applicable to subsequent work at the academy and what is most useful in general education.

In chemistry the course is a descriptive general one, based upon a concise statement of the more essential principles of chemistry, and includes that class of information deemed most important to nonspecialists, together with an accurate and logical treatment of many useful applications of chemistry.

Beginning January 2, the subject of electricity is taken daily. This term also closes with an examination, covering the essential parts of the subject studied during the term, which all cadets who have not shown a required proficiency in daily work must take.

The course in electricity is a brief exposition of the leading electrical phenomena and their relations to each other. It includes a study of the general principles of the subject and of the typical machines, generators, motors, and transformers, together with the more important uses of electricity. The laboratory exercises give experience with a number of the machines and in the use of a great variety of apparatus employed in the numerous forms of electrical measurements. In this term the laboratory work is a part of the electrical course, and all cadets enter the laboratory. All laboratory work is performed under the immediate supervision of an instructor.

Textbooks.

Elementary Lessons in Heat.—Tillman.	Practical Chemistry (Laboratory Guide).—Clowes.
Descriptive General Chemistry.—Tillman.	Elements of Electricity.—Robinson.

Standard works on the respective subjects are always available for reference, both to cadets and instructors.

DEPARTMENT OF DRAWING.

SECOND AND THIRD CLASSES.

The course in drawing extends through the third class year and through two-thirds of the second class year. Attendance is on alternate days for periods of two hours in the first year and one hour and a quarter in the next.

The course begins with instruction in the use of instruments and single-stroke lettering. This is followed by detailed instruction in orthographic projection, including problems in descriptive geometry, the preparation of detailed working drawings from models, and finally the preparation of finished assembly drawings of rather complicated mechanisms from data furnished in the shape of detailed drawings. All work is completed in pencil, carefully checked, and then finished in ink.

Along with this work practice is given in freehand technical sketching and the cadet's ability to visualize from the projections is tested by special problems in pictorial representation from the projections. Practice is also given in isometric projection from models and in perspective sketching from models and from orthographic projections.

Instruction in architectural drawing is limited to the preparation of the working plan and elevation of a small masonry building with the necessary lettering and dimensions.

In topographic drawing detailed instruction is given in the principles of map projection, map scales, the various methods of representing ground forms, and the conventional signs and system of rectangular coordinates prescribed for military maps. In addition to practice sheets each cadet is required to compile and finish in colored inks an accurate large-scale battle map of a small terrain from information furnished him in the form of small-scale general maps, special surveys, airplane photographs, and the coordinates of certain geodetic points.

Detailed instruction in the classroom and in the field is given in topographic and landscape sketching for military purposes, and each cadet is required to make such sketches on difficult ground with every attention to accuracy and neatness.

Instruction is mainly through a loose-leaf system of printed instruction sheets covering the various drawings and phases of the work. These are supplemented by short section-room lectures and blackboard illustrations when necessary. All work is under close supervision of instructors and personal instruction is constantly given.

Textbooks (for reference only): Engineering Drawing—French. Map Reading and Topographical Sketching—Stuart.

DEPARTMENT OF MODERN LANGUAGES.

SECOND, THIRD, AND FOURTH CLASSES.

In this department instruction is given in French and Spanish. The French course extends throughout the first and second years—attendance every other recitation day—188 lessons.

The Spanish course extends throughout the third year—attendance every other recitation day—94 lessons.

Both courses start with a study of pronunciation and grammar. Thereafter instruction is given in reading and composition. Conversation is taught throughout the courses. Descriptions of France, Spain, and Spanish-American countries, their people, customs, history, and literature, are given in lectures by native French and Spanish instructors.

Textbooks.

FRENCH.

FOURTH CLASS.

A French Grammar, by Morrison and Gauthier.	Martin's The French Verb. Bercy's La Langue Française.
---	---

THIRD CLASS.

Martin's Essentials of French Pronunciation.	Le Roi des Montagnes, About.
At West Point, Martin and Russell; composition.	En Campagne, Dupont.
Contes Choisis de Daudet, Broussard; composition.	Scènes et Récits de la Grande Guerre, Michaud.
	Martin's, The French Verb.

SPANISH.

SECOND CLASS.

Spanish Grammar, Wagner.	Scientific and Technical Spanish, Willcox.
Spanish Composition, Crawford.	Doña Perfecta, Galdós.
La Batalla del Marne, Blasco Ibáñez, Onís.	Teatro de Benavente, Benavente.
	Zalacaín el Aventurero, Baroja.

Books of reference.

French.—Cassell's French Dictionary; French Military Technical Dictionary, Willcox.

Spanish.—New Spanish-English and English-Spanish Dictionary, Cuyas, Appleton.

DEPARTMENT OF LAW.

The course in law extends throughout the first class year, half the class attending daily. The conference system of instruction is employed. The following courses are studied, each cadet attending for the number of periods indicated:

Elements of law. Fall term, 22 periods. Textbook: Smith's Elementary Law.

Criminal law. Fall term, 22 periods. Textbook: Clark's Criminal Law.

Constitutional law. Spring term, 18 periods. Textbook: Fenton's Constitutional Law.

Evidence. Spring term, 24 periods. Textbook: McKelvey on Evidence.

Military law. Spring term, 17 periods. Textbook: Manual for Courts-Martial, 1921.

Moot court. Spring term, 8 periods.

The department of law has a law library of about 3,397 volumes accessible to cadets.

DEPARTMENT OF ORDNANCE AND GUNNERY.

FIRST CLASS.

The course in ordnance and gunnery extends throughout the first class year, one-half of the class attending daily, Saturday excepted, for a period of 1 hour and 25 minutes.

During the first term the course includes a study of the properties, manufacture, care, and use of explosives, the theory of explosives, measurements of velocities and pressures, interior ballistics, exterior ballistics, projectiles, bombs, pyrotechnics, primers, fuses, ammunition supply, probability of fire, and adjustment of fire.

During the second term the course includes the study of the historical development of arms, materials used in construction of arms, principles of design of guns, carriages, and recoil systems, small arms, machine guns, artillery (field, seacoast, railway, and special), automotive equipment, tanks, tractors, trailers, and fire-control equipment.

The course is supplemented by lectures and by exhibits and models of the various types of arms, ammunition, and accessories.

Practical instruction is given in mechanical trades and is devoted to the principal operations performed in the ordinary wood and metal working shops. This includes the use of hand and machine woodworking tools, also bench and vise work, turning, planing, shaping, drilling, and milling operations, and the forging and hardening processes of metal-working shops. The practical instruction is supplemented by lectures and demonstrations on the maintenance, repair, and operation of ordnance matériel in the field.

Textbooks: Ordnance and Gunnery—Tschappat. Department pamphlets on ammunition. War Department publications.

DEPARTMENT OF MILITARY HYGIENE.

The course in hygiene extends through the last 30 periods of the cadet's third year at the Academy and is required for all cadets. Its basic purpose is the teaching of the principles and practice of military hygiene in such a manner as to prepare the future officer so to care for his own health and that of his men in garrison and the field as to keep the effective strength of his unit as near the maximum as possible, "to conserve fighting strength."

Some knowledge of anatomy and physiology is necessary as a foundation for the course, and as many cadets enter the academy without such knowledge a number of the periods, about one-third, is devoted to those subjects and constitutes a subcourse.

Textbook: Martin—The Human Body, latest edition.

The remainder of the course, approximately two-thirds, is devoted to the study of the elements of military hygiene. This subcourse deals mainly with principles, as its brevity precludes much more. It deals in the first part with the recruit and his environment, including personal hygiene, foods and their preparation, hygiene of the barracks, of camps, of moving troops, of hot and cold climates.

The second portion deals with the causes of disease, including remote or predisposing causes, immediate or exciting causes, and carriers of disease.

The third portion deals with the prevention and control of epidemics and the line officer's duties and responsibilities in relation thereto.

Textbook: Ashburn—Elements of Military Hygiene, third edition.

Instruction will be principally by lectures, with written examinations at intervals throughout the course.

DEPARTMENT OF ENGLISH.

The course in English extends through the cadet's first two years at the Military Academy. Recitation periods are on alternate week days, except Saturdays, throughout the academic year.

FOURTH CLASS YEAR (September to March).

English analysis and composition, and English prose readings.—This course consists of a review of the fundamental principles of English grammar, an analysis of the structure of selected English prose, and the theory of and practice in writing English exposition. Personal conferences are required between instructors and cadets on all theme work.

Prose readings in the field of nineteenth century narrative, essay, and history are required in conjunction with the composition study.

Textbooks: Holt and Chilton—English Analysis and Exposition. Holt—Selections from the Prose of Macaulay. Fiske.—Essays, Historical and Literary. Pierce and Canby—Selections from Stevenson.

FOURTH CLASS YEAR (March to June).

Survey of English literature, Shakespeare and Milton.—This work includes a detailed study for substance, method, and historical setting of three of Shakespeare's plays (a tragedy, a comedy, and a history), and the same for Milton's sonnets, certain selected shorter poems, and two books of Paradise Lost.

Textbooks: Long—History of English Literature. Holt—Leading English Poets. Shakespeare—Tragedies, comedies, and histories.

THIRD CLASS YEAR (entire year).

Survey of English literature of the eighteenth and nineteenth centuries, and oral exercises.—This course includes a study for content and form of several of the masterpieces of the eighteenth and nineteenth centuries, including examples of the work of Swift, DeFoe, Sheridan, Burns, Keats, Shelley, Byron, Wordsworth, Tennyson, Browning, Emerson, Thoreau, and Huxley.

Accompanying this survey course is oral work, consisting of a series of added exercises to develop ease and fluency in speaking. These exercises include reading aloud, military exposition, reviews of articles, precis of orders, etc.

Textbooks: Long—History of English Literature. Holt—Leading English Poets. Nettleton—The Major Dramas of Sheridan. Sherman—Essays and Poems of Emerson. Rogers and Pearson—The Voice of Science in the Nineteenth Century. Steeves and Ristine—Representative Essays in Modern Thought.

A special course in English prose of the last half century is given to the upper sections in English during the written general review period of the fall term. Instruction is by means of lectures on the literary development of this period. The principal prose writers are considered, including such names as Meredith, Hardy, Butler, Hudson, etc.

A special course in English poetry of the last half century is given to the upper sections in English during the written general review period of the spring term. The course comprises lectures on and readings from the chief verse writers of the period, including such names as Rossetti, Swinburne, Arnold, Mrs. Browning, Meredith, Hardy, Masfield, Housman, etc.

DEPARTMENT OF ECONOMICS, GOVERNMENT, AND POLITICAL HISTORY.

HISTORY.

The course in history is required of all cadets in the third class. Recitation periods are on alternate week days throughout the academic year.

The course includes a study of the political and international history of Europe from the outbreak of the French Revolution to the present day.

Fall term: Europe from 1789 to 1815. Spring term: Europe from 1815 to the present.

Textbooks: Holt and Chilton—Europe, 1789-1815. Hazen—Modern Europe. Holt and Chilton—Europe, 1862-1914. The Literary Digest Atlas of New Europe and the Far East.

A special course in the history of the United States from the Civil War until the present day is given to the upper sections during the written general review period of the regular course in the spring term.

Textbook: Bassett—A Short History of the United States.

ECONOMICS AND GOVERNMENT.

The course in economics and government is required of all cadets during their first class year. Government is given during the fall term; economics during the spring term. Recitation periods are on alternate week days throughout the academic year.

The study of government includes an introductory series of lectures on social evolution and the origin of modern institutions, lessons in the general principles of modern liberal government, and in the organization and operation of the Government of the United States.

Textbooks: Holt—Elementary Principles of Modern Government. Beard—American Government and Politics.

The study of economics includes an investigation of the economic organization of modern society, with special reference to the United States, and a consideration of the part money and credit play in the operation of this organization. Near the conclusion of the course, a short series of lessons on the principles of double-entry bookkeeping is introduced.

Textbooks: Clay—Economics for the General Reader. Moulton—The Financial Organization of Society. Twentieth Century Bookkeeping and Accounting. Part I.

THE LIBRARY.

Cadets and officers have free access to the library, which comprises approximately 108,000 volumes, with an extensive collection of maps, manuscripts, and rare books. The collection contains substantially all standard books on the subjects taught in the Academy, and is especially complete in military subjects. Its card catalogues (about 380,000 cards) are arranged with the special object of saving the time of cadets. The library is open on week days from 9 a. m. to 5 p. m.; on Sundays and holidays from 2 to 4 p. m.
